This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

"The Bahamas are famous for sun, sand-and swimming pigs." -National Geographic In the middle of paradise, with billionaires and celebrities for neighbors, is an island populated only by swimming pigs. For decades, this archipelago of 365 islands would remain largely unknown to the world. It would not be a ruthless pirate, pioneering loyalists, a notorious drug kingpin, or the infamous Pyre Festival that would unveil Exuma to the world, but rather the most unlikely of creatures. Appearing in magazines, videos, newspapers, commercials, TV shows, and countless selfies, the Swimming Pigs of Exuma, in the Bahamas, have become a bucket-list sensation and have been named one of the marvels of the universe. But how did they reach this celebrity status? What made them so famous? And why, in February 2017, did so many of them die? Pigs of Paradise is an unlikely story of humble beginnings and a swift rise to stardom. With interviews from historians, world-renowned ecologists, famous pig owners, and boat captains, it thoughtfully considers what this phenomenon says about not only these animals but also about us.

An anthology of the best mystery short stories published in 2017 selected by best-selling author Louise Penny.

The 2018 edition of The State of World Fisheries and Aquaculture emphasizes the sector's role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world's fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to aquaculture; climate change impacts and responses; the sector's contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO's efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to- date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

This year's report presents evidence that the absolute number of people who suffer from hunger continues to slowly increase. The report also highlights that food insecurity is more than just hunger. For the first time, the report provides evidence that many people in the world, even if not hungry, experience moderate food insecurity as they face uncertainties about their ability to obtain food and are forced to compromise on the quality and/or quantity of the food they consume. This phenomenon is observed globally, not only in low- and middle-income countries but also in high income countries. The report also shows that the world is not on track to meet global nutrition targets, including those on low birthweight and on reducing stunting among children under five years. Moreover, overweight and obesity continue to increase in all regions, particularly among school-age children and adults. The report stresses that no region is exempt from the epidemic of overweight and obesity, underscoring the necessity of multifaceted, multisectoral approaches to halt and reverse these worrying trends. In light of the fragile state of the world economy, the report presents new evidence confirming that hunger has been on the rise for many countries where the economy has slowed down or contracted. Unpacking the links between economic slowdowns and downturns and food insecurity and malnutrition, the report contends that the effects of the former on the latter can only be offset by addressing the root causes of hunger and malnutrition: poverty, inequality and marginalization.

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

"Cool Escapes Maldives" is a multimedia publication. It includes an interactive coffee table book with additional app and website : www.cool-escapes.com/maldives. The interactive mix of print and digital publications showcases in-depth and innovative inside views on the natural beauty of the country with its tropical islands and fascinating underwater world. In connection with the app the book will open a complete new reading experience and extend beyond the pages with interactive features such as videos, photogalleries, weblinks, recipes, ingredient lists, and more. Also you can easy locate each of the resorts on the map. The publication presents 32 individual resorts in this unique country of tropical Islands. Furthermore, it will take you behind the scenes to cultural, artistic, and natural highlights, with additional portraits of people such as marine biologists, diving instructors, resort managers, chefs de cuisine, photographers, musicians, and artists. See how to setup, real romantic events, honeymoon & wedding special, experience the most indulgent spa treatments, and receive expert information about the ocean life, underwater world, nature, and so much more !

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage." Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Mesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

NEW YORK TIMES BESTSELLER • A riveting, true-life legal thriller about the government's pursuit of billionaire hedge fund manager Steven Cohen and his employees at SAC Capital—a revelatory look at the power and wealth of Wall Street ONE OF THE BEST BOOKS OF THE YEAR—The New York Times and The Economist • “An essential exposé of our times—a work that reveals the deep rot in our financial system . . . Everyone should read this book.”—David Grann, author of Killers of the Flower Moon Steven A. Cohen changed Wall Street. He and his fellow pioneers of the hedge fund industry didn't lay railroads, build factories, or invent new technologies. Rather, they made their billions through financial speculation, by placing bets in the market that turned out to be right more often than not. Cohen was revered as one of the greatest traders who ever lived. But that image was shattered when his fund, SAC Capital, became the target of a seven-year government investigation. Prosecutors labeled SAC a “magnet for market cheaters” whose culture encouraged the relentless pursuit of “edge”—and even “black edge,” which is inside information—and the firm was ultimately indicted and pleaded guilty to charges related to a vast insider trading scheme. Cohen, himself, however, was never charged. Black Edge raises urgent and troubling questions about those who sit at the pinnacle of high finance and how they have reshaped the economy. Finalist for the New York Public Library’s Helen Bernstein Book Award for Excellence in Journalism • Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction and the Financial Times and McKinsey Business Book of the Year Award
