Apolonia "Lina" Flores is a sock enthusiast, a volleyball player, a science lover, and a girl who's just looking for answers. Even though her house is crammed full of books (her dad's a bibliophile), she's having trouble figuring out some very big questions, like why her dad seems to care about books more than her, why her best friend's divorced mom is obsessed with making cascarones (hollowed eggshells filled with colorful confetti), and, most of all, why her mom died last year. Like colors in cascarones, Lina's life is a rainbow of people, interests, and unexpected changes. In her first novel for young readers, Diana L ó pez creates a clever and honest story about a young Latina girl navigating growing pains in her South Texan city.

When twelve-year-old Izzy discovers a beat-up baseball marked with the words "Because magic" while unpacking in yet another new apartment, she is determined to figure out what it means. What secrets does this old ball have to tell? Her mom certainly isn't sharing anyespecially when it comes to Izzy's father, who died before Izzy was born. But when she spends the summer in her Nana's remote New Mexico village, Izzy discovers long-buried secrets that come alive in an enchanted landscape of watermelon mountains, whispering winds, and tortilla suns. Infused with the flavor of the southwest and sprinkled with just a pinch of magic, this heartfelt middle grade debut is as rich and satisfying as Nana's homemade enchiladas.

Homesick for New York City, twelve-year-old Oliver feels very much out of his element in war-torn Balabad, until he gets caught up in a centuries-old mystery involving stolen artifacts and buried treasure.

A review based on the world ' s most popular medical text Market: internal medicine residents (24,000); internists (77,000 general; 75,000 specialty), third year medical students (17,000) Duplicates the organization and coverage of the new Harrison ' s Principles of Internal Medicine, 18e More than 1000 questions simulate the primary certification exam in internal medicine Coverage spans the entire spectrum of internal medicine

The book that serves as the basis for the popular " Harrison ' s Podclass " podcast series! This outstanding collection of internal medicine Q&A is perfect for prepping for board or shelf exams, getting in multiple " reps " of self directed learning, and increasing your understanding of clinical reasoning. It ' s packed with 1,000+ high-quality clinical vignettes, with expert, on-point explanations for correct and incorrect answers. Harrison ' s Principles of Internal Medicine Self-Assessment and Board Review reflects all the specialties of internal medicine, and has been exhaustively revised and updated to reflect hundreds of never-before published Q&A in board-style format. This great resource will bolster your understanding of pathophysiology, epidemiology, differential diagnosis, clinical decision making, and therapeutics. Illustrations, radiographs, and pathology slides are included throughout. Each question is accompanied by a complete answer and explanation, and cross-referenced to Harrison ' s Principles of Internal Medicine for deeper-dive understanding. 325 full-color photos and illustrations Clinical vignettes and Q&A presented in board-style format Content consistent with board exam blueprint in internal medicine Aligned with Harrison ' s Principles of Internal Medicine, the global authority in medicine Explanations for correct and incorrect answer choices

The themes of the papers presented in this book emphasize theoretical and practical issues for modelling human-machine interaction, ranging from the attempt in describing " the spacing and orientation in co-present interaction " to the effort for developing multimodal interfaces, collecting and analysing interaction data and emergent behaviour as well as analysing the use of nonverbal and pragmatic elements of exchanges, implementing discourse control and virtual agents and using active listening in computer speech processing.

This open access book deals with imaging of the abdomen and pelvis, an area that has seen considerable advances over the past several years, driven by clinical as well as technological developments. The respective chapters, written by internationally respected experts in their fields, focus on imaging diagnosis and interventional therapies in abdominal and pelvic disease; they cover all relevant imaging modalities, including magnetic resonance imaging, computed tomography, and positron emission tomography. As such, the book offers a comprehensive review of the state of the art in imaging of the abdomen and pelvis. It will be of interest to general radiologists, radiology residents, interventional radiologists, and clinicians from other specialties who want to update their knowledge in this area.

This is one of the first books to deal specifically with diagnostic imaging of the entire spectrum of kidney cancers. Both new and conventional imaging modalities are fully considered. After an introductory chapter on the histopathological classification of kidney cancers, the advantages and disadvantages of the various imaging modalities used in the diagnosis and assessment of disease extension are documented. Subsequent chapters offer an exhaustive description of the radiological features of the different histological subtypes of kidney cancer, with radiological and histological illustrations and tables. The latest innovations in interventional and minimally invasive procedures are also well covered. The book benefits from carefully chosen and technically excellent images. Each of the 24 chapters is written by an internationally acclaimed expert, making this book the most current and complete treatment of the subject available. It should be of great interest to radiologists, oncologists, and urologists.

This book focuses on endovascular methods for resuscitation and trauma management. Written by highly qualified and clinically active physicians from around the world, it shares information gathered over the past decade, providing a comprehensive database of clinical knowledge for a wide range of practicing clinicians and researchers. Moreover, it describes basic methods for vascular access, methods for REBOA (Resuscitative Endovascular Balloon Occlusion of the Aorta), endo-grafts and embolization methods, as well as other, more advanced methods for endovascular and hybrid resuscitation (CPR REBOA, ECHMO etc.) from the pre-hospital to the post-surgical phase. As the body of literature in this field has grown considerably over the past five years, the book also focuses on summarizing what is known, what the clinical and research evidence is, and " how to actually use " the various methods. It will help readers understand basic and advanced modern techniques for bleeding control and modern resuscitation, and how to apply them in clinical practice.

'Imaging for Students' provides a comprehensive introduction to all aspects of diagnostic and interventional imaging, written specifically for medical students and junior doctors. Starting with a clear explanation of how each imaging modality actually works, the reader is then guided step-by-step through the range of imaging modalities available, with important information included on the hazards and risks associated with medical imaging. The work includes a detailed guide to the interpretation of plain films of the chest and abdomen, before providing a system-based tutorial covering the most common conditions that require imaging for diagnostic confirmation. Using evidence-based studies and guidelines, 'Imaging For Students' takes a logical approach to the investigation of clinical scenarios, where possible indicating the 'best first test'. 'Imaging For Students' also gives an overview of medical imaging procedures, emphasizing the importance of patient preparation and post-procedure observation. With its comprehensive and thoughtful coverage, 'Imaging For Students' presents students with everything they need to know for a clear understanding of the advantages, disadvantages, and possible side effects of the imaging modalities available.
