The algorithms are implementations of the pseudocode in Appendix C of An Introduction to NURBS. Here the algorithms have been loosely translated into a 'real' programming language, i.e., C. Hopefully, the availability of the algorithms in C will increase your understanding of the algorithms and hence of the underlying mathematics.

An Introduction to Nurbs: With Historical Perspective by ...

Nonuniform rational B-splines (NURBS) are used in modeling curves and surfaces such as animated objects, aircraft wings, or other engineering parts. The basic idea is to produce a patchwork of pieces of mathematically simpler curves or surfaces that, when joined in a suitably smooth fashion across boundaries, closely approximate the object being modeled so that calculations can be performed.
