What is a Sheep Heart Dissection? A sheep heart dissection involves cutting into particular areas of a sheep's heart so that we can see each of the different sections and learn more about what each part of a heart looks and feels like. A sheep's heart and sheep internal anatomy are very similar to a human, so it gives us an opportunity to learn more about what a human heart might look like on the inside.

able to make connections between what we had learned about the structure and function of the heart with what we could observe on a real heart. 2.

ANATOMY- Sheep HEART DISSECTION - ANJA'S AICE  
1. Insert your dissecting scissors or scalpel into the superior vena cava and make an incision down through the wall of the right atrium and ventricle, as shown by the dotted line in the external heart picture. Pull the two sides apart and look for three flaps of membrane. These membranes form the tricuspid valve.

Sheep Heart Dissection - The Biology Corner  
Dissection of the Sheep Heart and Human Heart  
INTRODUCTION The heart is a cone-shaped muscular organ, about the size of your fist. It is located in the mediastinum region (central region of the thoracic cavity), between the lungs, and behind the sternum. The heart is a hollow organ, containing 4 chambers. At least one blood vessel attaches

Sheep Heart Dissection Lab, Heart Anatomy Flashcards | Quizlet

To do this, follow these steps: a. Insert a blade of the scissors into the superior vena cava and cut downward. through the atrial wall (Figure 36.5). b. Open the chamber, locate the tricuspid valve and examine its cusps. c. Using a spray bottle, run some water through the tricuspid valve to fill the.

Sheep Heart Dissection Lab - Glencoe High School Anatomy ...

The dissection of the heart occurs in two phases. Phase 1 involves the examination of the external features and the identification of the four main vessels that can be viewed without cutting the heart open. Phase 2 involves the cutting of the heart so that the internal chambers and valves can be viewed.
