Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

The narrator consents to the strange fellow ' s request. They soon become friends and the Little Prince informs the pilot that he is from a small planet, the asteroid 325, talks to him about the baobabs, his planet volcanoes and the mysterious rose that grew on his planet. He also talks to him about their friendship and the lie that evoked his journey to other planets. Often puzzled by the grown-ups ' behavior, the little traveler becomes a total and eternal symbol of innocence and love, of responsibility and devotion. Through him we get to

See how insightful children are and how grown-ups aren't. Children use their heart to feel what's really important, not the eyes. Heart-breaking, funny and thought-provoking, it is an enchanting and endlessly wise fable about the human condition and the power of imagination. A book about both childhood and adulthood, it can be read as a parable, a war story, a classic children's fairy-tale, and many more things besides: The Little Prince is a book for everyone; after all, all grown-ups were children once.

emotions via our stomachs. Not surprising when you consider there is something equivalent to the size of a village football pitch hiding inside our bellies--that 's the incredible magnitude of our digestive systems. Dr Matveikova answers the obvious questions: " How? " and " Why can this be so? " by explaining, in straight forward layman ' s language, that the digestive system contains more than one million neurones, identical to those in the brain and is responsible for producing 90% of the body ' s hormone, serotonin, the all-important hormone which makes us feel happy and full of wellbeing. It follows that, if our stomach is " out of sorts " we feel irritable and lacking in energy; and those feelings block our

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

With his unique storytelling pizzazz, he recounts his departure into moviemaking, with such slapstick comedies as Take the Money and Run, and revisits his entire, sixty-year-long, and enormously productive career

Alitha is aboard her father's ship, heading to the Sandwich Islands where she plans to marry Thomas, a minister. After surviving the wreck of her father's ship, Alitha is cast adrift on a uninhabited island off the Pacific coast. Rescued eventually, first by Indians and then Esteban, a Spanish settler.
