When the R100RS first came on the scene in 1977, it caused a complete sensation. Sporting a revolutionary wedge-shaped fairing that offered the rider near total enclosure, it provided unparalleled riding ease and protection. When fitted with optional saddlebags it sang the song of the open road that BMW riders cherished: long distances at high speeds with comfort and convenience. The first modern street motorcycle with a frame-mounted fairing, it was not only the most stunning BMW model, but with its new 980cc flat-twin motor, also the most powerful. Soon, a vast aftermarket sprang up around it with all sorts of updates for its suspension, handling, and power, as well as a large community of loyal fans and owners which exists to this day. Stermer's timeless book is the engaging story of where that legendary motorcycle came from including an interview with designer Hans Muth, what it was like to ride, and what it meant to motorcycling, told well and with luscious full-color photographs. Stermer's insightful insider's view of this storied machine shows why it continues to live on as one of the most recognizable and groundbreaking machines of our times.

The air-cooled boxer BMW twins were among the most significant motorcycles of the late 1970s and 1980s, providing an unparalleled combination of comfort, reliability, and performance. Written by a world-renowned motorcycle journalist and featuring 190 colour photographs, here is the authoritative work on these machines.

There are lots of books about the classic BMW Boxers; their history, performance, lineage, and the minutiae of its specification. But none of them concentrate entirely on telling you what to look for when buying one secondhand. That's what this book is about - it is a straightforward, practical guide to buying a used Boxer twin. It doesn't list all the correct colour combinations for each year or analyse the bike's design philosophy - there are excellent books listed at the end of this one that do all of that - but it will help you avoid buying a dud. Point by point, it takes the reader through everything that

needs looking at when buying a Boxer, plus spares prices, which is the best model to buy for your needs, and a look at auctions, restorations and paperwork The last of the 'classic' air-cooled Boxer twins, these bikes are now collector's items, and many have been saved, restored and continue to be ridden - this book tells the reader how to be part of the Boxer's ongoing story.
