MAHARASTRA HSC QB Malcolm Forbes said “ Education’s purpose is to replace an empty mind with an open one ” and this is something which is always followed by Maharashtra State Board of Secondary & Higher Education (MSBSHSE). The aim of the Board is not just to let learners obtain basic knowledge but to make them life-long learners. The purpose of this book is to nurture individuality and thus enhance one’s innate potentials which help in increasing the self-study mode for students. This book strengthens knowledge and attitude related to subject. This book is designed in such a way that students can set their own goals and can improve their problem solving and thinking skills. This book is strictly as per the latest Maharashtra Board Curriculum for HSC Exams. It contains variety of questions from latest textbooks. It contains all types of questions like VSA Questions (Very Short Answer), SA Questions (Short Answer), MCQs (Multiple Choice Questions) and LA Questions (Long Answer). A synopsis is given for every chapter which contains important points from that chapter. Each chapter has high quality figures wherever required for better, fast and clear understanding. OSWAAL HSC Question Bank is different and better in terms of High Quality Questions which are developed by ‘OSWAAL Expert Panel’. The Question Bank is strictly based on the latest MSBSHSE Textbooks and is arranged ‘ TOPIC-WISE ’ where each Topic from every Chapter is explained in detail. Through OSWAAL Books students are taught how to think, not what to think. We at OSWAAL Books try to use quality content, standard language, creativity and high quality figures, which makes learning easy and fun. This is one of the reasons that the scope of this book extends from students to teachers. Teachers can use this book as a perfect teaching guide and students can use this book for good learning and practice.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition.We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery.Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people.Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever.

Presents the principles and trends in the taxonomy of angiosperms. This book places stress on the definitions, methodology and concepts of taxonomy. It compares various systems of classifications and explains intricate rules of plant nomenclature. It provides information on important herbaria and botanical gardens of the world.

In this book you will find nearly 600 typical multiple-choice examination questions, nearly 600 extension questions, plus summaries for the Year 12 Chemistry course. Answers to all questions are provided. Questions follow the dot points in the Board of Studies syllabus and focus on the three core topics plus the option topic Shipwrecks, Corrosion and Conservation.

This publication, prepared jointly by the WHO, the World Meteorological Organization and the United Nations Environment Programme, considers the public health challenges arising from global climate change and options for policy responses, with particular focus on the health sector. Aspects discussed include: an overview of historical developments and recent scientific assessments; weather and climate change; population vulnerability and the adaptive capacity of public health systems; the IPCC Third Assessment report; tasks for public health scientists; the health impacts of climate extremes; climate change, infectious diseases and the level of disease burdens; ozone depletion, ultraviolet radiation and health; and methodological issues in monitoring health effects of climate change.

Biological nitrogen fixation has essential role in N cycle in global ecosystem. Several types of nitrogen fixing bacteria are recognized: the free-living bacteria in soil or water; symbiotic bacteria making root nodules in legumes or non-legumes; associative nitrogen fixing bacteria that resides outside the plant roots and provides fixed nitrogen to the plants; endophytic nitrogen fixing bacteria living in the roots, stems and leaves of plants. In this book there are 11 chapters related to biological nitrogen fixation, regulation of legume-rhizobium symbiosis, and agriculture and ecology of biological nitrogen fixation, including new models for autoregulation of nodulation in legumes, endophytic nitrogen fixation in sugarcane or forest trees, etc. Hopefully, this book will contribute to biological, ecological, and agricultural sciences.

This work is a taxonomical, nomenclatural and historical account of the plants depicted in the Minickx Atlas and in the books by Jan and Casper Commelin.

In tracing the history of Darwin ’ s accomplishment and the trajectory of evolutionary theory during the late nineteenth and early twentieth centuries, most scholars agree that Darwin introduced blind mechanism into biology, thus banishing moral values from the understanding of nature. According to the standard interpretation, the principle of survival of the fittest has rendered human behavior, including moral behavior, ultimately selfish. Few doubt that Darwinian theory, especially as construed by the master ’ s German disciple, Ernst Haeckel, inspired Hitler and led to Nazi atrocities. In this collection of essays, Robert J. Richards argues that this orthodox view is wrongheaded. A close historical examination reveals that Darwin, in more traditional fashion, constructed nature with a moral spine and provided it with a goal: man as a moral creature. The book takes up many other topics—including the character of Darwin ’ s chief principles of natural selection and divergence, his dispute with Alfred Russel Wallace over man ’ s big brain, the role of language in human development, his relationship to Herbert Spencer, how much his views had in common with Haeckel ’ s, and the general problem of progress in evolution. Moreover, Richards takes a forceful stand on the timely issue of whether Darwin is to blame for Hitler ’ s atrocities. Was Hitler a Darwinian? is intellectual history at its boldest.
