Business Law, 5th Edition (James et al.) is written for business students to provide a clear and accessible introduction to the legal system. Business law courses are the first exposure to law for many business students and the first time they are obliged to think deeply about the discipline. This updated edition presents business law in a practical context rather than the doctrinal context that many major legal publishers use. The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for lecturers.

Business Law 2e is the new edition of a textbook that has been positively launched into the higher education market. The text presents business law principles in a clear and easy-to-understand style. The objective of a business law subject is to ensure that students acquire enough knowledge of the law of business so they can recognise and solve simple legal problems, organise their affairs in order to avoid more complex or serious legal problems, and appreciate the connection of legal principles within a range of commercial environments. As the majority of students are required to study business law as part of either a commerce or business degree, this textbook follows a functional approach to the study of business law rather than doctrinal so the principles of business law are contextualised within a business environment. Business students need to know more than what the law is, they need to know where to find it, how to read it, how to use it and how it impacts on all facets of business. Students who use this textbook will develop a greater awareness of the law and its broad application to business and commercial environments.

Concise Australian Commercial Law, now in its fifth edition, has two basic objectives: to provide students with a general understanding of the legal environment of business and to expose them to the language and perspectives of legal professionals, regulators and other commercial actors; and to provide a reference point for non-law students studying key commercial law topics - the law of contract, torts, consumer protection, agency, business organisations and business ethics - in a way that is clear, accessible and challenging for a non-law student. The authors have selected cases that should be of interest to non-law students and every effort has been made to ensure that the case extracts contain sufficient information to enable students to discuss and debate the decisions that a court has reached and appreciate how the principles could be applied in a commercial environment.

Similarly the relevant legislation is discussed in a way that is designed to promote understanding of the law and the policy considerations behind the legislation. The fifth edition been updated to incorporate the many legislative changes and case law developments since the last edition. These updates include: a revised introduction (including a guide on how to approach the study of commercial law); a number of new contract law cases and an expanded section on online contracting; amendments to the Australian Consumer Law as well as a number of interesting new cases concerning consumer protection; case law developments in relation to the standard of care and causation in negligence; the recent 'safe harbour' amendments to the Corporations Act and a number of new cases dealing with directors' duties; and revisions to the chapter on Business Ethics to include references to the Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry (the Banking Royal Commission). To ensure the text is a more complete teaching and learning package, there is a revised set of activities at the end of each chapter that have been written with the non-law student in mind and can readily be used in a student-centred group work environment.

The purpose of this book is to provide graduate students, professional engineers, military officers, and weapons-systems planners with a comprehensive grounding in the technology, evolution, functions, costs, impacts on society, utility, and limitations of modern strategic weapons systems. Since the subject is often left to the specialists, this work should introduce the general reader to the fundamentals of such systems in an informed manner. Nowadays the intense interaction of means and ends symbolized by strategic weapons has stimulated a changing discipline in which new missile systems and the intricate logic of nuclear force and counterforce hold the stage alongside the truths of conflict, alliances, fears, games, and subtle gains and losses. Many readers with new personal interest or public responsibility in this complex field will require an overall guide to it. This book will not prepare the reader to become an expert in the vast subject of strategic weapons systems. It will, however, enable him to understand, evaluate, and form reasonable opinions about these systems, their capabilities and effectiveness. The subject is dealt with more from the viewpoint of the user (investor) rather than the architect (systems engineer) and builder (design engineer). While the user will be concerned with both political as well as technical options which may be available to solve a problem, the systems and design engineers are concerned with analyzing and building technological weapons devices once their requirements are generally known.
