Calculating a Concentration To

calculate the concentration of a solution, compare the amount of solute to the amount of solution and multiply by 100 percent. For example, if a solution contains 10 grams of solute dissolved in 100 grams of solution, then its concentration can be reported as 10 percent.

a substance that can act as either an acid or base (ex. water). An amino acid has a basic amine group and an acidic carboxylic acid group, so it is also amphoteric. Unlike water, amino acids can carry multiple charges depending on their environment. At pH 7, most amino acids have a protonated amine group and a deprotonated carboxylic acid group.
