The People vs. Big Oil—how a working-class company town harnessed the power of local politics to reclaim their community With a foreword by Bernie Sanders Home to one of the largest oil refineries in the state, Richmond, California, was once a typical company town, dominated by Chevron. This largely nonwhite, working-class city of 100,000 suffered from poverty, pollution, and poorly funded public services. It had one of the highest homicide rates per capita in the country and a jobless rate twice the national average. But when veteran labor reporter Steve Early moved from New England to Richmond in 2012, he discovered a city struggling to remake itself. In Refinery Town, Early chronicles the 15 years of successful community organizing that raised the local minimum wage, defeated a casino development project, challenged home foreclosures and evictions, and sought fair taxation of Big Oil. A short list of Richmond's activist residents helps to propel this compelling chronicle: •94 year old Betty Reid Soskin, the country's oldest full-time national park ranger and witness to Richmond's complex history •Gayle McLaughlin, the Green Party mayor who challenged Chevron and won •Police Chief Chris Magnus, who brought community policing to Richmond and is now one of America's leading public safety reformers Part urban history, part call to action, Refinery Town shows how concerned citizens can harness the power of local politics to reclaim their community and make municipal government a source of much-needed policy innovation. "Refinery Town provides an inside look at how one American city has made radical and progressive change seem not only possible but

sensible.”—David Helvarg, *The Progressive*

In an ideal world, the laws of Congress--known as federal statutes--would always be clearly worded and easily understood by the judges tasked with interpreting them. But many laws feature ambiguous or even contradictory wording. How, then, should judges divine their meaning? Should they stick only to the text? To what degree, if any, should they consult aids beyond the statutes themselves? Are the purposes of lawmakers in writing law relevant? Some judges, such as Supreme Court Justice Antonin Scalia, believe courts should look to the language of the statute and virtually nothing else. Chief Judge Robert A. Katzmann of the U.S. Court of Appeals for the Second Circuit respectfully disagrees. In *Judging Statutes*, Katzmann, who is a trained political scientist as well as a judge, argues that our constitutional system charges Congress with enacting laws; therefore, how Congress makes its purposes known through both the laws themselves and reliable accompanying materials should be respected. He looks at how the American government works, including how laws come to be and how various agencies construe legislation. He then explains the judicial process of interpreting and applying these laws through the demonstration of two interpretative approaches, purposivism (focusing on the purpose of a law) and textualism (focusing solely on the text of the written law). Katzmann draws from his experience to show how this process plays out in the real world, and concludes with some suggestions to promote understanding between the courts and Congress. When courts interpret the laws of Congress, they should be mindful of how Congress actually functions, how lawmakers signal the meaning of statutes, and what those legislators expect of courts construing their laws. The legislative record behind a law is in truth part of its foundation, and therefore merits consideration.
