Close-Up and Macro Photography | Lester Lefkowitz - YouTube

Close up photography is the act of photographing objects such as flowers or insects in close range so the subject you are photographing fills the frame. In other words, it's the act of photographing subjects close up. This is easily achievable with any lens, even a 300mm telephoto lens. Macro photography is in essence close up photography as well.

Difference Between Macro Micro and Close Up Photography ...

Close-up means you're just shooting at a short distance from the subject. You can use virtually any lens to achieve close-up photos. Macro means you're taking super close-ups of objects at 1:1. Meaning, the size of the image on your sensor is equal to the size of the item you're photographing in real life.

Close-Up Photography vs Macro vs Micro (What's the Difference)

What is Close-Up Photography I call myself a macro photographer, but technically I'm a close-up photographer, as is the majority of photographers that call themselves macro photographers.

What is Close-Up Photography - Award Winning Macro ...

The camera lens you use is the real defining difference between close up and macro photography. Anyone can take a close-up picture, such as with a telephoto lens. But generally, macro photography can only be created with a macro lens. These pricy lenses allow you to capture the detail of an insect's head, or the texture of a flower petal.

Knowing the Difference Between Macro, Micro, and Close-Up ...

Macro photography is one that takes close-up shots of small objects, such as seeds, bath bubbles, and flowers. Strictly speaking, for photos to be considered macro images, the subject has to be magnified to larger than its life-sized equivalent. Macro photos can be captured in an indoor studio or in an outdoor environment.

38 Macro Photography Ideas To Shoot at Home

Basic Equipment For Macro Photography. In my camera bag for taking macro photographs are lenses and accessories that allow me to get close and focused on small details. If you're just getting started, check out the macro lenses available for your system. These will typically be in the 80mm to 100mm range. Lenses designated as "macro" lenses are the surest bet, but you can do close-up photography with a variety of lenses if they provide suitable magnification and close-focusing ability.

Macro Photo Tips: Focus On The Details - Outdoor Photographer

However, even slightly lower magnification values, up to 1:2, can have a very dramatic visual effect. This is called close-up photography. Generally, close-up and macro photography are interchangeably used terms. While not fully correct, this is fine.
