In 1993 and 1994, two Rapid Assessment Program teams conducted biological surveys in the Cordillera del Cóndor between Ecuador and Peru, one of the largest intact regions of Andean lower montane forest. This book presents the results of their surveys. The great topographic and geological complexity of this region, combined with a climate of year-round high humidity, have resulted in very high plant species diversity. This diversity of habitats and species with restricted distributions makes the Cóndor an important refuge for many taxa.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

Long neglected by European historians, the unspeakable atrocities of Franco's Spain are finally brought to tragic light in this definitive work. Evoking such classics as Anne Applebaum's Gulag and Robert Conques's The Great Terror, The Spanish Holocaust sheds light on one of the darkest and most unexamined eras of modern European history. As Spain finally reclaims its historical memory, a full picture can now be drawn of the atrocities of Franco's Spain:from torture and judicial murders to the abuse of women and children. Paul Preston provides an unforgettable account of the systematic terror carried out by Spain's fascist government.

The history of modern Spain is dominated by the figure of Francisco Franco, who presided over one of the longest authoritarian regimes of the twentieth century. Between 1936 and the end of the regime in 1975, Franco's Spain passed through several distinct phases of political, institutional, and economic development, moving from the original semi-fascist regime of 1936/45 to become the Catholic corporatist [organic democracy] under the monarchy from 1945 to 1957. Distinguished historian Stanley G. Payne offers deep insight into the career of this complex and formidable figure and the enormous changes that shaped Spanish history during his regime.
