Up until this point

us to configure our

Before we can start posting to the General Ledger, there is a little bit of housekeeping that we need to do in order to set up all of the codes and

Now that we have

up a squirrely
problem within the

finances that with
some postings, we
want to distribute
the amounts of the
posting over
multiple
departments, cost
centers and even
business units. For
example, rent
might be shared
across all the
departments
residing in that

Online Library
Configuring The
building. But we
don't want to have
to enter in a rent
posting multiple
times and manually
calculate the
breakout of the
expense to each of
the departments
which may be in
proportion to that
department's
square footage of
office space

occupied, Ledger
headcount, or
some other criteria.
Luckily there is a
solution for this
within Dynamics
365 for Operations
where we can
create Allocation
Rules which wait
for specific account
combinations to be
posted to and then
based on an

Online Library Configuring The

allocation rule, it will break up the posting and then distribute it over a set of pre-defined financial dimensions, and spread the posting amount fairly and automatically. In this guide we will show you how to configure

Another benefit of
having the
Organizational
Units configured is
that we can now
take advantage of
them within the
Account Structures
and add them as

dimensions. This
allows us to include
them when we are
posting to the
ledger so that we
can further refine
our postings and
assignment by
department,

can also have
different versions

let's look at some of the other journal types that we can create. We will start by checking out the Periodic Journals. Periodic Journals are designed to take care of all those journals that we need to post on a regular basis such as expenses,
