Drawing on work in linguistics, language acquisition and computer science, this book proposes that grammatical constructions play a central role in the relation between the form and meaning of simple sentences. The author demonstrates that the syntactic patterns associated with simple sentences are imbued with meaning - that the constructions themselves carry meaning independently of the words in a sentence.

Constructions: A Construction Grammar Approach to Argument ...

In addition, Goldberg presents specific analyses of several constructions, including the ditransitive and the resultative constructions, revealing systematic semantic generalizations. Through a comparison with other current approaches to argument structure phenomena, this book narrows the gap between generative and cognitive theories of language.

Construction Grammar approaches (CxG, as outli ned, e.g., in Hoffmann & Trousdale 2013; cf. also Goldberg 2006, 2013; Hoffmann 2017a,b .) is a theory of language th at assumes that

(PDF) A Construction Grammar Approach to Genes

This paper sketches a grammar of English relative clause constructions (including infinitival and reduced relatives) based on the notions of construction type and type constraints. Generalizations about dependency relations and clausal functions are factored into distinct dimensions contributing constraints to specific construction types in a multiple inheritance type hierarchy.

Constructions: A construction grammar approach to argument ...

Construction grammar (often abbreviated CxG) is a sociobiological family of theories within the field of cognitive and evolutionary linguistics.These posit that human language consists of constructions, or learned pairings of linguistic forms with meanings.Constructions correspond to replicators or memes in memetics and other cultural replicator theories.

Construction grammar - Wikipedia

The essential principles of construction grammar. Because there is no textbook, I summarize the essential principles of construction grammar: Constructions are symbolic units or signs, that is, a pairing of form and meaning. A construction is the only unit of grammatical representation. There is a continuum from schematic complex constructions (corresponding to syntactic rules in other theories) to substantive atomic constructions, that is, words (corresponding to the lexicon in other theories).

Construction grammar | LLAS Centre for Languages ...

Constructions are correspondences of phonological form, syntactic properties and meaning, of any size or complexity. In the case of a word, the syntactic properties consist of its category and agreement features such as number and gender. But in the case of idioms, the syntactic properties must also include their phrase structure.
