Since 2004, Thailand's southern border provinces have been plagued by violence. There are a wide array of explanations for this violence, from the revival of Malay nationalist movements and the influence from the global trend of radical Islam, to the power play among the regional underground crime syndicates, politicians, and state authorities. The disparate interpretations signal the dynamic and complex discursive contention of this damaging and enduring conflict, and this book looks at how this is played out in the Thai media, and with what possible consequences. In analysing the southern conflict coverage, the book presents the deficiencies in news coverage, as produced by four news organisations of different natures across a seven-year review period, and discusses the professional practices that hinder journalism from serving as a fair arena for healthy and rational democratic debates. Based on in-depth interviews with news workers, it argues that Thai journalism is not always monolithic and static, as shown in the discursive shifts in news content, the variations of journalistic practices and news workers' disparate stances on the conflict. The book goes on to highlight the less immediately apparent difficulties of political conflict reporting, such as the subtle patterns of intimidation and media manipulation, as well as the challenges of countering socially-prevailing hegemonic beliefs in Thai society. Exploring the political contingencies and socio-cultural influences at play, this book provides an in-depth study of journalism's role in politics in Thailand, and is of interest to students and scholars of Southeast Asian Politics, Media Studies and Peace and Conflict Studies.

Critically but sympathetically interrogating Italian philosopher Giorgio Agamben's analysis of the logic of sovereign power, this volume draws attention to the multiple zones of exclusion in and through which contemporary international politics constitutes itself. Beginning from the margins and peripheries of world politics, this book emphasises the colonial processes through which contemporary "third world" spaces of exception have been shaped and particular bodies made susceptible to the conditions of "bare life". The authors contend that these bodies inhabit a variety of spaces or "zones of indistinction" that include political detainees, refugees, asylum-seekers, poor migrants, sweatshop workers, and unassimilated indigenous populations. These are the "expendable bodies" that the territorial and market-driven logic of current international relations simultaneously produces, polices and excludes. Focussing on the locally and socio-historically specific ways that sovereign power works, the individual chapters provide the volume with a

wide geographical reach. Drawing on diverse approaches, this text constitutes an important intervention in critical international relations, providing grounded theory and sophisticated analyses of how contemporary international relations works through the production of 'exceptions'. Bringing together a range of internationally-renowned scholars, *International Relations and States of Exception* will be of vital interest to students and scholars of *International Relations, Critical Theory and Postcolonial Studies*.

This book offers a critical examination of contemporary higher education reforms in Thailand situated in the broader historical, socio-economic and political changes. Through a qualitative case study with three methods of inquiry, this book explores why different 'global education policies' such as quasi-privatisation, internationalization, and quality assessment (QA) have resonated in Thailand's higher education sector. Grounded in policy borrowing and lending, this book uses the politics, economics and culture of borrowing to analyse major reforms in Thailand for the past one hundred years. It is argued that historical legacy, policy contexts and belief systems of policy elites play pivotal roles in facilitating policy changes or the lack thereof. While historical analysis elucidates that the Thai state has always been an active borrower of western ideas, the perseverance of the 'Thainess' discourse has often been used to suggest its so-called independence and idiosyncrasy. This in-depth analysis of the Thai case aims to contribute to the critical studies in Asian education, comparative higher education, policy borrowing and lending and Thai studies. *The Culture of Borrowing* intensively studies the policy appropriation in the Thai education system by analysing:

- Selective Borrowing and the Historical Development of Thai Higher Education
- The Asian Economic Crisis as Window of Opportunity: Autonomous University
- Internationalization of Teaching: Quantitative and Qualitative Challenges
- The Emergence of Quality Policies and their Rationales
- The Intended and Unintended Consequences of Quality Policies

This book will appeal to researchers in Education, particularly to scholars studying educational policies within the context of tertiary education. It will also interest scholars specialising in Asian and South-east Asian Studies.

Thailand, a long-standing defence partner of the United States and ASEAN's second largest economy, occupies a geostrategically important position as a land bridge between China and maritime Southeast Asia. This book, based on extensive original research, explores the current state of US-Thai relations, paying particular attention to how the United States is perceived by a wide range of people in the Thai defence establishment and highlighting the importance of historical memory. The book outlines how the US-Thai relationship has been complicated and at times turbulent, discusses how Thailand is deeply embedded in multi-faceted relationships with many Asian states, not just China, and examines how far the United States is blind to the complexities of Asian international relations by focusing too much on China. The book concludes by assessing how US-Thai relations are likely to develop going forward. Additionally, the work contributes to alliance theory by showing how domestic politics shapes memory, which in turn affects perceptions of other states.

This book examines the theory and practice of Corporate Social Responsibility (CSR) in countries across Asia, including China, Japan, Malaysia, Thailand and Bangladesh, providing much needed Asian perspectives on this important issue. Arguing that Western CSR has enjoyed limited effectiveness, it asks whether Asia can avoid the West's mistakes.
