The Hogan Development Survey (HDS) describes the dark side of personality – qualities that emerge in times of increased strain and can disrupt relationships, damage reputations, and derail peoples' chances of success. These tendencies are of particular concern in supervisory, managerial and leadership roles as they can lead to negative consequences for productivity, retention and the bottom line as well as eroding staff trust, loyalty and enthusiasm.

The Bright and Dark Side of Altruism A new study by PCL and researchers at University College London (UCL) sheds light on why some people appear more altruistic than others. Delving into the personality traits linked to altruistic behaviour can help identify employees who value altruism and assist those organisations that consider altruism to be an important ethical value.

Introduced in 1997, the HDS is the only personality assessment that identifies critical blind spots that lead to career derailment. The Hogan Development Survey (HDS) describes the dark side of personality – qualities that emerge in times of increased strain and can disrupt relationships, damage reputations, and derail peoples' chances of success. By assessing dark-side personality, you can recognize and mitigate performance risks before they become a problem.

### Hogan Development Survey | Hogan Assessments

Dark side personality characteristics describe flawed interpersonal strategies which, at their extreme, result in counterproductive behaviours. Such dysfunctional tendencies emerge
