it! This means, we can fix your system board, rather than replace it, which will save you money. LapFix is THE choice for motherboard repair.

## Motherboard Repair | LapFix

A motherboard refers to the main circuit board of any electronic device that incorporates one or more printed control boards (PCBs). Traditionally, the motherboard facilitates communication between the various components of the device, passing inputs from peripherals through the CPU, or Central Processing Unit, to be processed and transmitted as output to the speakers, motors, screens, or ...

settings first.

## Motherboard Failure: Diagnosis and Solutions

The exact method required to update the BIOS varies by motherboard manufacturer and model. Some motherboards are updated simply by copying the updated BIOS file to a floppy disk or CD and booting from it. Other motherboards use a DOS-based "flasher" program that runs from floppy disk and installs the BIOS file when it executes.
