In this issue, pioneering TV writer and producer April Kelly opens with a wicked story that may remind you to pay attention to what you eat. Brendan DuBois appears with the story of an assassination and its aftermath—from the killer’s point of view. Ray Daniel & Kellye Garrett team up with a story that brings together characters from their own series. Our feature is by Walter Satterthwait, who comes at us with his first new story in a while. The lead character, Fallon, helps—in his own way—solve a murder at a monastery. Edgar Award-winning author Sylvia Maultash Warsh brings us a piece about deception in the world of art, and we welcome Benjamin Boulden back with his second story for us. Robb T. White returns following his Best Mystery Stories of 2019 entry in our pages, and Dane F.

Baylis, Richard Prosch and Richard Risemberg debut in our magazine with some of the most entertaining crime fiction you'll find.

Returning to Carver hasn't been the same since Jesse left, but after almost four years, Riley Regas has gotten used to it. She picked up the pieces after he broke her heart and has moved on. Evan has shown Riley how to love again, but when she comes home for the summer before her senior year of college, Jesse's unexpected return causes everything she worked so hard to put behind her to come rushing back. She can deny she still feels something for Jesse, but how can she forgive the way he left her and what about her future with Evan? With her past and present colliding, what life will she choose and will Riley ever truly find happiness?

know is that their creator was living out
some of the same incredibly bizarre
scenarios that he wrote about. One can
easily compare Philip to the character
played by Arnold Schwarzenegger in
"Total Recall," who found himself in a
parallel universe on a faraway planet,

despite the fact that he was only supposed to be hooked up in a laboratory to a machine that creates realistic dream-like images. Which reality is the character really living in? At a sci-fi press conference held in France in 1977, Philip tried to explain some of his bewildering thoughts about the existence of a parallel or self-contained - Matrix-like - universe created by "someone" who has the ability to alter the course of time and our concept of reality: "People claim to remember past lives," Philip told the throng of reporters and fans. "I claim to remember a different - very different - present life. I know of nobody who has ever made this claim before but I rather suspect that my experience is not unique. What perhaps is unique is my willingness to talk about it. We are living in a computer-programmed reality and the only clue we have to it is when some variable is changed and some

alteration in our reality occurs . . . and because of this a variable WAS changed - reprogrammed as it were - and an alternative world branched off." Drawing on the masterful mind of creative genius Philip K. Dick we offer up dozens of his personal experiences, as well as those of others in the UFO and paranormal fields, where synchronicities seem to abound. This is NOT science fiction. This is a universe that cannot be so easily grasped or explained. The well-known collector of scientific curiosities, Charles Fort, is often quoted as having said: "The Earth is a farm. We are someone's property." He likened our condition to being movable pieces on a chess board. "There is no doubt that we are under some sort of surveillance and that an "invisible hand" has the ability to carve out our existence and "interfere" in our daily lives by creating a variety of bizarre "play scripts"

that to some may seem like pure "coincidences." Or so says pop culture paranormalist Tim Beckley, who notes that "Synchronicities are not just random occurrences but are laid out before us by some sort of synchronicity command post, which ably demonstrates their mastery or control over us hapless earthlings."

Drawing on the masterful mind of creative genius Philip K. Dick (some to this day perceive him to have been a total "mad man") we offer up dozens of his personal experiences, as well as those of others in the UFO and paranormal fields, where synchronicities seem to abound. Beckley and co-author Sean Casteel lay out a plausible scenario to "explain" the intricate workings of what has been dubbed "The Synchronicity Command Board," or "Earth Coincidence Control Office," as so aptly named by the brilliant American marine biologist and neurologist, Dr. John

C. Lilly. THE MATRIX CONTROL SYSTEM OF PHILIP K. DICK - AND THE PARANORMAL SYNCHRONICITIES OF TIMOTHY GREEN BECKLEY has been compiled by Tim Beckley and Sean Casted with an Introduction by Tessa Dick and added contributions by such esteemed researchers as: Philip K. Dick, Tim Swartz, Nick Redfern, Diane Tessman, Hercules Invictus, Brad Steiger, Brent Raynes, Cynthia Cirile, Valarie D. Orazio, and others who have come to conclude we are living in a computerized simulation, and like PKD acknowledge the existence of the Matrix.

For anyone on a life journey through pain towards transformation, Miriam Bracha Heimler's intimate, powerful memoir will help deepen your determination to overcome life's seemingly insurmountable

obstacles. Through touching vignettes Heimler paints vivid portraits of her continuing life challenges: She escapes Communist East Germany as an 11 year old just before the rise of the Berlin Wall, leaving her Nazi father in the Communist East. Despite her struggles to overcome loneliness and poverty in a strange new world, and in defiance of having to fight peers' prejudice and feelings of inadequacy, she succeeds in school and university. With great courage and determination she is then able to leave her finally familiar new world in West Germany behind to follow her mentor across the world. Her developing confidence leads her to learn and teach her mentor's method about overcoming adversity, - a subject that she intuitively knew; - a lesson that life had taught her through experience already at a young age. And in yet another growth-step she

transforms her spiritual world by becoming Jewish. Her unimaginable joy in marrying her mentor is shattered when she loses him after only a few years of marriage. While still grieving her tremendous loss, she finally develops the courage to again reach beyond her pain and fulfills her spiritual dream by moving to Israel and living a meaningful Jewish life. Heimler's endearing, earthy, captivating style draws the reader into her multi-layered inner world of imagination, determination and hope. The depth of the scenes she paints is reminiscent of great literature of the past, rather than superficial current works. The reader will enrich her / his life by diving into this real life treasure of vulnerability.

Greenhouse gas emissions by the livestock sector could be cut by as much as 30 percent through the wider use of existing

best practices and technologies. FAO conducted a detailed analysis of GHG emissions at multiple stages of various livestock supply chains, including the production and transport of animal feed, on-farm energy use, emissions from animal digestion and manure decay, as well as the post-slaughter transport, refrigeration and packaging of animal products. This report represents the most comprehensive estimate made to-date of livestock's contribution to global warming as well as the sector's potential to help tackle the problem. This publication is aimed at professionals in food and agriculture as well as policy makers.

Autism was once thought of as a rare condition, until the Centers for Disease Control and Prevention's Autism and Developmental Disabilities Monitoring Network released the statistic that about 1

in every 150 eight-year-old children in various areas across the United States is afflicted by an autism spectrum disorder, or ASD. This news led to a dramatic expansion of research into autism spectrum disorders and to the emergence of applied behavior analysis (ABA) as the preferred method of treatment, even among prescribing practitioners. *Applied Behavioral Analysis for Children with Autism Spectrum Disorders* ably synthesizes research data and trends with best-practice interventions into a comprehensive, state-of-the-art resource. Within its chapters, leading experts review current ABA literature in depth; identify interventions most relevant to children across the autism spectrum; and discuss potential developments in these core areas: Assessment methods, from functional assessment to single case research designs. Treatment methods, including

reinforcement, replacement behaviors, and other effective strategies. The role of the differential diagnosis in ABA treatment planning. Specific deficit areas: communication, social skills, stereotypies/rituals. Target behaviors, such as self-injury, aggression, adaptive and self-help problems. ASD-related training concerns, including maintenance and transition issues, and parent training programs. This volume is a vital resource for researchers, graduate students, and professionals in clinical child and school psychology as well as the related fields of education and mental health.

A history of American ideas about life and death discusses how the age of discovery, Darwin's theories of evolution, and the space age changed ideas about life on Earth.

Perlin conjoins philosophical and socio-cultural anthropologies to derive universal foundations of human reason in terms of which cultural difference may both logically and historically be understood. Global commodification before industrialisation offers abundant evidence for the translatability of all cultures.

A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.
