Lockheed has been one of American's largest corporations and most important defense contractors from World War II to the present day (since 1995 as part of Lockheed Martin Aeronautics Company). During the postwar era, its executives enacted complicated business responses to black demands for equality. Based on the papers of a personnel executive, the memoir of an African American employee, interviews, and company publications, this narrative history offers a unique inside perspective on the evolution of equal employment and affirmative action policies at Lockheed Aircraft's massive Georgia

plant from the early 1950s through the early 1980s. Randall L. Patton provides a rare, perhaps unique, account of African American struggle and management response, set within the context of the regional and national struggles for civil rights. The book describes the complex interplay of black protest, federal policy, and management action in a crucial space in the national economy and within the South, contributing to business history, policy history, labor history, and civil rights history.

After more than twenty years of mass unemployment in Britain and throughout much of Europe can the aspiration of "jobs for all" once again become a reality? Working for Full Employment considers the feasibility of full employment in a modern market economy. The book is written by a group of experts who were pivotal in pushing full employment up the political agenda in the mid 1990's. They identify the hard choices which policy makers must face and discuss why full employment has been so elusive for the past twenty years. The authors examine: * The effects of new technology and increased trade * The increased participation of women in the labour market * The impact of labour market regulation on employment * Worksharing * How welfare reform can help the long term unemployed into jobs * The role of industrial policy * Reform of pay bargaining Well informed and accessible, this book is a valuable contribution to the developing debate on labour market policy.

Through anecdotes, history, and analysis, this book offers sound advice to prepare prospective editors for the full range of their duties: editing copy, determining what is news, understanding graphics and design, directing coverage, managing people, and coping with a spectrum of ethical and legal dilemmas.

Comprehensive and clearly focussed, this is a must-read text for students of employment relations. The accessible writing style is combined with a wealth of contemporary examples, allowing the reader to fully engage with the key critical debates surrounding each topic.
