Extreme Architecture showcases 45 recent buildings designed for challenging environments, giving valuable insights into the extremes of architectural thinking. Projects range from a desert refuge in southern Arizona to a floating marine research centre, an underground seed vault in northern Norway and a research station at the South Pole.

Extreme Architecture: Building for Challenging ...

Be it climate, terrain or programme, these buildings have something going against them. Pleasingly, Space really is of the intergalactic kind, offering an unusual insight into Spacestation architecture, both in and out of this world. This small but weighty companion is one for your coffee table, if you think it's hard enough.

Extreme Architecture: Building for challenging ...

Extreme Architecture: Building For Challenging Environments by Ruth Slavid. Ruth Slavid writes with a clarity of expression that is rare in architectural commentary. Her collection of buildings designed for hostile environments is eclectic in the extreme. She examines a floating cruise terminal, a scientific outpost in Antarctica and a cultural centre in the wastes of the Canadian desert.

Extreme Architecture: Bulding for Challenging Environments ...

January 16, 2018 by fmagalhaes. If there is one condition of modern architecture, it's that the construction must prevail standing. Yet some architects push the limits, obviously challenging with Newton's universal law of gravity, to design structures that not only seem to defy reasoning but are excellent at that.

12 wilderness homes designed to survive every challenge

Book Review From the Stacks: Extreme Architecture – Building for Challenging Environments. November 19, 2019 | By Sean Ruthen. "The fascination of architecture in extreme environments is that it is so demanding technically, yet offers so much potential... the greatest constraint usually comes from the need not to spoil the natural environment, and that demands more judgment than the need to match the brickwork of an adjoining building."

Book Review From the Stacks: Extreme Architecture ...

Chile's strong and challenging climates and geographies provide a prime location for what author Ruth Slavid calls "extreme architecture." In Extreme Architecture, Building for Challenging Environments, Slavid analyzes the relationship between architecture and nature, drawing on Germán del Sol's projects such as Remota Hotel in Puerto Natales, Patagonia. The name "Extreme Architecture" refers to architecture built in extreme environments—all of them related to extreme ...
