New fire safety rules affecting all non-domestic premises in England and Wales will come into force on 1 October 2006, in accordance with the Regulatory Reform (Fire Safety) Order 2005 (S.I. 2005/1541, ISBN 0110729455). This is one of a series of 11 publications which set out recommendations and guidance for employers, managers, occupiers and owners of particular types of premises on how to carry out a fire risk assessment and how to identify general fire precautions required (including fire detection and warning systems, firefighting equipment, escape routes, signs and training). This guide covers all offices and retail premises (including individual units within larger premises, e.g. shopping centres). The other related guides are for Large places of assembly (ISBN 1851128212) and Factories and warehouse storage premises (ISBN 1851128166).

This guide does not set prescriptive standards, but provides recommendationsand guidance for use when assessing the adequacy of fire precautions in offices and shops.Other fire risk assessment methods may be equally valid to comply with fire safety law. The guide also provides recommendations for the fire safety management of the premises. It applies to Northern Ireland only

This guide does not set prescriptive standards, but provides recommendations and guidance for use when assessing the adequacy of fire precautions in small and medium places of assembly. Other fire risk assessment methods may be equally valid to comply with fire safety law. The guide also provides recommendations for the fire safety management of the premises. It applies to Northern Ireland only

This book arrives at just the right time to facilitate understanding of performance-based fire risk assessment in buildings – an integral part of the global shift in policy away from traditional prescriptive codes. Yung, an internationally recognised expert on the subject of fire risk assessment, introduces the basic principles and techniques that help the reader to understand the various methodologies that are currently in place or being proposed by different organisations. Through his illustration of basic principles and techniques he enables the reader to conduct their own fire risk assessments. He demonstrates how the probabilities of fire scenarios are assessed based on the probabilities of success and failure of fire protection measures that are in place. He also shows how the consequences of fire scenarios are assessed based on the intensity and speed of fire and smoke spread, the probability and speed of occupant response and evacuation, and the effectiveness and speed of fire department response and rescue efforts. Yung's clear and practical approach to this highly topical subject enables the reader to integrate the various tools available into a quantitative framework that can be used for decision making. He brings an invaluable resource to all those involved in fire engineering and risk assessment, including students, academics, building designers, fire protection engineers, structural engineers, regulators and risk analysts.

New fire safety rules affecting all non-domestic premises in England and Wales will come into force on 1 October 2006, in accordance with the Regulatory Reform (Fire Safety) Order 2005 (S.I. 2005/1541, ISBN 0110729455). This is one of a series of 11 publications which set out recommendations and guidance for employers, managers, occupiers and owners of particular types of premises on how to carry out a fire risk assessment and how to identify general fire precautions required (including fire detection and warning systems, firefighting equipment, escape routes, signs and training). This guide covers premises where the main use of the building or part of the building is a factory or warehouse. It will be relevant for premises where flammable materials and substances are handled and stored, and may also be applicable where the premises adjoin other complexes (although co-operation with other managers will be required as part of an integrated risk assessment for the complex). Another guide in this series covers offices and shops (ISBN 1851128158).

Andrew Furness and Martin Muckett give an introduction to all areas of fire safety management, including the legal framework, causes and prevention of fire and explosions, fire protection measures, fire risk assessment, and fire investigation. Fire safety is not treated as an isolated area but linked into an effective health and safety management system. Introduction to Fire Safety Management has been developed for the NEBOSH Certificate in Fire Safety and Risk Management and is also suitable for other NVQ level 3 and 4 fire safety courses. The text is highly illustrated in full colour, easy to read and supported by checklists, report forms and record sheets. This practical approach makes the book a valuable reference for health and safety professionals, fire officers, facility managers, safety reps, managers, supervisors and HR personnel in companies, as well as fire safety engineers, architects, construction managers and emergency fire services personnel. Andrew Furness CFIOSH, GIFireE, Dip2OSH, MIIRSM, MRSH, is Managing Director of Salvus Consulting Limited who specialise in Fire Safety. He was the chairman of the NEBOSH / IOSH working party that developed the NEBOSH Fire Safety and Risk Management certificate. Martin Muckett MA, MBA, CMIOSH, MIFireE, Dip2OSH, former Principal Health and Safety Advisor to The Fire Service Inspectorate and Principal Fire Safety Officer, Martin is currently Salvus Consulting Limited's Senior Fire Safety Trainer / Consultant.

New fire safety rules affecting all non-domestic premises in England and Wales will come into force on 1 October 2006, in accordance with the Regulatory Reform (Fire Safety) Order 2005 (S.I. 2005/1541, ISBN 0110729455). This is one of a series of 11 publications which set out recommendations and guidance for employers, managers, occupiers and owners of particular types of premises on how to carry out a fire risk assessment and how to identify general fire precautions required (including fire detection and warning systems, firefighting equipment, escape routes, signs and training). This guide covers premises where the main use is the provision of residential care (where the primary purpose is to provide personal and/or nursing care, not healthcare treatment) and typical residential care premises might provide care for the elderly or infirm, children and young persons, people with special needs, and people with additions). It may also be suitable for individual residential care premises that are part of other multi-use complexes. Other guides in this series cover healthcare premises (ISBN 1851128247) and sleeping accommodation (ISBN 1851128174).

This textbook is directly aligned to the NEBOSH National Certificate in Fire Safety and Risk Management, with each element of the syllabus explained in detail. Each chapter guides the student through the syllabus with references to legal frameworks and guidelines. Images, tables, case studies and key information are highlighted within the text to make learning more productive. Covering fire behaviour, safety, management, risk assessment, prevention and the changes to HSG65, the book can also be used as a daily reference by professionals. Written by experts in the field of fire safety Complete coverage that goes beyond the syllabus content making it a useful resource after study Illustrated throughout to enhance understanding
