New code sets new standards for flat roofing - Building ...

In a nutshell, BS 6229 : 2018 describes best current practice in the design, construction, care and maintenance of roofs with a flat or curved surface, at a pitch not greater than 10 degrees to the horizontal, with a continuously supported flexible waterproof covering. Sounds like a bit of a mouthful, but the concept is actually quite simple.

BS 6229 : 2018 The new standards in flat roofing | Axter

Underneath the basics, flat roofs are usually constructed with a ceiling, nailed to joists which support a deck (usually wood in residential construction), a vapor barrier, insulation and a roof board. From there, the flat roof system you choose will determine the materials you apply.

A Design & Materials Guide for Residential Flat Roofing ...

According to BS 6229 & BS 8217, flat roofs should be designed with minimum falls of 1:40 to ensure a finished fall of 1:80 can be achieved, allowing for any inaccuracies in the construction. This applies to general roof areas along with any internal gutters. Flat roof design guide.

Flat Roof Falls & Drainage Provision in Designs - Bauder
Maintenance should always be in accordance with IKO recommendations and the Flat Roofing Code of Practice (BS 6229:2003). Flat roofs should be inspected at least twice a year – more if they are located in areas with lots of trees. Regular scheduled inspections resulting in clearance of detritus and early detection of damage is essential to ensure flat roofs meet and surpass their guarantee period.

Flat Roof Design Considerations| Flat Roof Construction
Abstract This British Standard provides recommendations on the design and application of flat roofs with continuously supported roof coverings. It covers weathertightness, drainage, thermal design, sound insulation, condensation control, structural support, fire precautions, maintenance and repair.

BS 6229:2003 - Flat roofs with continuously supported ...
Flat roofs aren't architecturally logical, as rain and snow will shed much more quickly off a sloped roof. Yet for historic Modern-style buildings like This Old House's Cambridge TV project, flat roofs are at the core of the architecture, meant to reflect the broad horizontal lines of the natural landscape.. Of course, you don't need to live in a modern house to deal with a flat roof.
