Begin by using a small screwdriver to release the wiring safety clip on the harness for the actuator. These clips can be brittle and break so be gentle. Once released gently pull down on the wiring connector and remove it from the blend door actuator. Inspect the connector for rust or corrosion and clean as needed.

How to Replace a Blend Door Actuator in Under 15 Minutes

Wipe with the tack cloth and then spray a new clear coat layer over the patched and surrounding area. Wait overnight for the clear coat to dry. Sand the clear coat with the saturated 2000-grit wet/dry sandpaper until the coat is smooth over the patch and surrounding area and blends seamlessly into the surrounding paint.

How to Blend the Patching Area When Painting a Car

It is necessary to blend metallic and pearl colors in order to have a good match in most cases.

Gutters are installed across the front eave of nearly every house to help move rain and water away from the house. Rain drains from the roof, down the gutters and through the downspout away from the house. Gutters are typically made of either aluminum or vinyl and both are installed in a similar manner.
