The first comprehensive work to place archetypal psychology within a major tradition of modern thought, that of mythical thinking, and to recognize imagination as the primal force and basic reality of human existence.

This small book is the first comprehensive essay to place archetypal psychology within a major tradition of modern thought—the tradition of mythical thinking—and to recognize imagination as the primal force and basic reality of human life. By drawing upon the writings of four twentieth-century thinkers, Roberts Avens clarifies the post-Jungian direction of psychology as it moves toward poetic and polytheistic imagination. He then compares the radical achievements of this direction in resolving the ‘ego-question’ with the methods and ideas of the East: Buddhism, Tantrism, Zen, and Vedanta. Avens’s grasp of understanding, easy familiarity with his subject, and refined insights together make this book an introductory text and an advance into new territory.

In this perennial bestseller, Seth challenges our assumptions about the nature of reality, and shows us how we create our personal reality through our conscious beliefs about ourselves, others, and the world. His message is clear: we are not at the mercy of the subconscious, or helpless before forces we cannot understand. “ We are Gods couched in creaturehood, ” Seth says, “ We are given the ability to form our experience as our thoughts and feelings become actualized. ” “ Seth was one of my first metaphysical teachers. He remains a constant source of knowledge and inspiration in my life. ” — Marianne Williamson “ I would like to see the Seth books as required reading for anyone on their spiritual pathway. The amazing in-depth information in the Seth books is as relevant today as it was in the early ’ 70s when Jane Roberts first channeled this material. ” — Louise Hay

One of the most powerful of the Seth Books, this essential guide to conscious living clearly and powerfully articulates the furthest reaches of human potential, and the concept that we all create our own reality according to our individual beliefs. Having withstood the test of time, it is still considered one of the most dynamic and brilliant maps of inner reality available today. “ The Seth books present an alternate map of reality with a new diagram of the psyche . . . useful to all explorers of consciousness. ” — Deepak Chopra “ Seth was one of my first metaphysical teachers. He remains a constant source of knowledge and inspiration in my life. ” — Marianne Williamson “ I would like to see the Seth books as required reading for anyone on their spiritual pathway. The amazing in-depth information in the Seth books is as relevant today as it was in the early ’ 70s when Jane Roberts first channeled this material. ” — Louise Hay

Seth is the acclaimed non-physical teacher whose collected works are the most dynamic, brilliant and undistorted map of inner reality and human potential available today. His articulation of the furthest reaches of human potential, the eternal validity of the soul, and the concept that we create our own reality according to our beliefs, has been presented in books that have sold over 8 million copies and been translated into over a dozen languages. Seth’s empowering voice clearly stands out as one of the major forces which led to the current New Age philosophical movement. This book chronicles Seth’s first contact with author and medium Jane Roberts. It is a mixture of great Seth excerpts, selected by topic, and further explained by Jane. Topics covered include: afterdeath & between lives, how to get rid of illness, reincarnation, why people are born into different circumstances, God, All That Is, Dreams, exercises to develop the inner senses, and much more.

Gnosis, in the hands of Roberts Avens, is a perennial philosophy of the heart. This book provides a readable, uncomplicated, and reliable introduction to Gnostic thought in the works of Martin Heidegger and James Hillman. As a psychological philosopher, Avens brings fresh meaning to the basic gnostic ideas about angels, salvation through knowledge, and the world as alive and ensouled. Therapies that encourage personified images and ecology movements concerned with the soul in things can find a profound philosophical ground in this new Gnosis.Third, revised edition

Adam Roberts’ fourth novel is his most ambitious yet. In a feat of extraordinary world building he creates a universe where a breathable atmosphere extends out between the planets, where aristocrats cruise interstellar space in biplanes and skywhals make mysterious distant orbits. Then, with bravura plotting, he undermines our own notions of reality and leaves the reader unsure which universe to believe in. Gaining a reputation as one of the UK’s leading SF stylists and masters of the high-concept, Roberts, shortlisted for the Arthur C. Clarke award with his debut novel SALT, confirms his extraordinary potential with POLYSTOM.
