Volume three centers almost exclusively around the actions of Brigid Roth, an advanced technologist that was part of the group that created the Injection. The story builds on the established work of previous volumes, but it works very well as a stand-alone tale, a real rarity for a continuing series. The art is excellent.

The third volume in the Injection series focuses on don't-call-her-a-hacker Brigid as she digs into the mystery of why a dead body is strapped to a stone circle in Cornwall. Whereas the second volume in the series still felt fairly tied into the whole rogue AI plot, this third volume pretty much leaves the AI behind to focus on the fantastical.

refining processes, and metallurgical process phenomena; Processing Phenomena, encompassing ferrous processing; non-ferrous processing; and refractory, reactive and aqueous processing of metals; and Industrial Processes, encompassing process modeling and computational tools, energy optimization, environmental aspects and industrial design. The work distills 400+ years combined academic experience from the principal editor and multidisciplinary 14-member editorial advisory board, providing the 2,608-page work with a seal of quality. The volumes will function as the process counterpart to Robert Cahn and Peter Haasen's famous reference family, *Physical Metallurgy* (1996)--which excluded process metallurgy from consideration and which is currently undergoing a major revision under the editorship of David Laughlin and Kazuhiro Hono (publishing 2014). Nevertheless, process and extractive metallurgy are fields within their own right, and this work will be of interest to libraries supporting courses in the process area. Synthesizes the most pertinent contemporary developments within process metallurgy so scientists have authoritative information at their fingertips Replaces existing articles and monographs with a single complete solution, saving time for busy scientists Helps metallurgists to predict changes and consequences and create or modify whatever process is deployed
