The KA-7300 is currently powering a sub-sat system, and the KA-7100 is on a pair of Wharfedales that are part of my multi-room audio setup. These amps are a huge sonic improvement over the much newer (but still vintage) NAD receivers I had been using, and they weren't bad.

A GLOBE AND MAIL BEST BOOK OF 2018 Eight months before he became a suicide bomber, Prin went to the zoo with his family. Following a cancer diagnosis, forty-year old Prin vows to become a better man and a better Catholic. He's going to spend more time with his kids and better time with his wife, care for his recently divorced and aging parents, and also expand his cutting-edge research into the symbolism of the seahorse in Canadian literature. But when his historic college in downtown Toronto faces a shutdown and he meets with the condominium developers ready to take it over—including a foul-mouthed young Chinese entrepreneur and Wende, his sexy ex-girlfriend from graduate school—Prin hears the voice of God. Bewildered and divinely inspired, he goes to the Middle East, hoping to save both his college and his soul. Wende is coming, too. The first book in a planned

trilogy, *Original Prin* is an entertaining and essential novel about family life, faith, temptation, and fanaticism. It's a timely story about timeless truths, told with wise insight and great humour, confirming Randy Boyagoda's place as "one of the best satirical writers today." (Micah Mattix, *The American Conservative*)

Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone
