Today ' s complex, information-intensive problems often require people to work together. Mostly these tasks go far beyond simply searching together; they include information lookup, sharing, synthesis, and decision-making. In addition, they all have an end-goal that is mutually beneficial to all parties involved. Such “ collaborative information seeking ” (CIS) projects typically last several sessions and the participants all share an intention to contribute and benefit. Not surprisingly, these processes are highly interactive. Shah focuses on two individually well-understood notions: collaboration and information seeking, with the goal of bringing them together to show how it is a natural tendency for humans to work together on complex tasks. The first part of his book introduces the general notions of collaboration

and information seeking, as well as related concepts, terminology, and frameworks; and thus provides the reader with a comprehensive treatment of the concepts underlying CIS. The second part of the book details CIS as a standalone domain. A series of frameworks, theories, and models are introduced to provide a conceptual basis for CIS. The final part describes several systems and applications of CIS, along with their broader implications on other fields such as computer-supported cooperative work (CSCW) and human-computer interaction (HCI). With this first comprehensive overview of an exciting new research field, Shah delivers to graduate students and researchers in academia and industry an encompassing description of the technologies involved, state-of-the-art results, and open challenges as well as research opportunities.

This book examines the ways in which artists and arts organizations today forge collaborative, socially engaged situations that involve non-professionals in the process of making art, often over a period of time, through creating opportunities to examine collective concerns and needs. Collaborative art praxis is gaining prominence in the Middle East, North Africa, and South Asia (MENASA) region. This is a discursive method that is experimental, with results that often expand the notions of what art is—and how it can be produced. After an introduction to global approaches to such a practice, Ali examines the foundation of contemporary art in the MENASA that is linked to a longer history of colonialism. The book analyzes artist-led initiatives and community-based organizations through themes including relational aesthetics, war and violence, blight in marginalized places around the world, in addition to questions associated with art and its

In a career that has spanned four decades, choreographer Twyla Tharp has collaborated with great musicians, designers, thousands of dancers, and almost a hundred companies. She's experienced the thrill of shared achievement and has seen what happens when group efforts fizzle. Her professional life has been -- and continues to be -- one collaboration after another. In this practical sequel to her national bestseller *The Creative Habit*, Tharp explains why collaboration is important to her -- and can be for you. She shows how to recognize good candidates for partnership and how to build one successfully,

and analyzes dysfunctional collaborations. And although this isn't a book that promises to help you deepen your romantic life, she suggests that the lessons you learn by working together professionally can help you in your personal relationships. These lessons about planning, listening, organizing, troubleshooting, and using your talents and those of your coworkers to the fullest are not limited to the arts; they are the building blocks of working with others, like if you're stuck in a 9-to-5 job and have an unhelpful boss. Tharp sees collaboration as a daily practice, and her book is rich in examples from her career. Starting as a twelve-year-old teaching dance to her brothers in a small town in California and moving through her work as a fledgling choreographer in New York, she learns lessons that have enriched her collaborations with Billy Joel, Jerome Robbins, Mikhail Baryshnikov, Bob Dylan, Elvis Costello, David Byrne, Richard Avedon, Milos Forman, Norma

Kamali, and Frank Sinatra. Among the surprising and inspiring points Tharp makes in *The Collaborative Habit*: -Nothing forces change more dramatically than a new partnership. -In a good collaboration, differences between partners mean that one plus one will always equal more than two. A good collaborator is easier to find than a good friend. If you've got a true friendship, you want to protect that. To work together is to risk it. -Everyone who uses e-mail is a virtual collaborator. -Getting involved with your collaborator's problems may distract you from your own, but it usually leads to disaster. -When you have history, you have ghosts. If you're returning to an old collaboration, begin at the beginning. No evocation of old problems and old solutions. -Tharp's conclusion: What we can learn about working creatively and in harmony can transform our lives, and our world.
