Using MIS is the book that teaches students how people use information systems to solve business problems. Building on students' experience and knowledge base from personal MIS to workgroup MIS to enterprise MIS, this text stresses the important role of Information Systems in satisfying business objectives. Realistic examples, mini-cases, case applications, and thought-provoking review material with projects promote active learning. This text is beneficial to the business professional interested in a basic understanding of management information systems today.

The second edition of Principles of Business Information Systems has been fully updated to reflect the latest developments in business information systems. Cases have been updated, increasing the international content and questions and exercises have also been revised. This new edition is suitable for students studying on any information systems course, helping to prepare them for the corporate world in the twenty-first century.

This text is an unbound, binder-ready edition. Information Technology for Management by Turban, Volonino Over the years, this leading IT textbook had distinguished itself with an emphasis on illustrating the use of cutting edge business technologies for achieving managerial goals and objectives. The 9th ed continues this tradition with coverage of emerging trends in Mobile Computing and Commerce, IT virtualization, Social Media, Cloud Computing and the Management and Analysis of Big Data along with advances in more established areas of Information Technology. The book prepares students for professional careers in a rapidly changing and competitive environment by demonstrating the connection between IT concepts and practice more clearly than any other textbook on the market today. Each chapter contains numerous case studies and real world examples illustrating how businesses increase productivity, improve efficiency, enhance communication and collaboration, and gain competitive advantages
