and depth of musical life in the United States during the first half of the twentieth century. Contributions consider the rise and triumph of popular forms such as jazz, swing, and blues, as well as the contributions to art music of composers such as Ives, Cage, and Copland, among others. American contributions to music technology and dissemination, and the role of these forms in extending the audience for music, is also a focus.

Draws on decades of scientific research to overview how memory has been

composers, and conductors whose stories and recollections are woven into the fabric of this book, but musical scores and concert halls, *Musical Maryland* is an engaging, authoritative, and bold look at an endlessly compelling subject.

School and Amateur Orchestras is devoted to a discussion of school and amateur orchestras and consideration of instruments that are normally associated with them. The book opens with a general discussion of students, teachers, music centers, and junior music schools. This is followed by

separate chapters on the teaching of string, woodwind and brass, and percussion instruments. Subsequent chapters deal with the planning and direction of orchestras and the selection of instruments and music.

For most of the history of film-making, music has played an integral role serving many functions - such as conveying emotion, heightening tension, and influencing interpretation and inferences about events and characters. More recently, with the enormous growth of the gaming industry and the Internet, a new role for music has

emerged. However, all of these applications of music depend on complex mental processes which are being identified through research on human participants in multimedia contexts. The Psychology of Music in Multimedia is the first book dedicated to this fascinating topic. The Psychology of Music in Multimedia presents a wide range of scientific research on the psychological processes involved in the integration of sound and image when engaging with film, television, video, interactive games, and computer interfaces. Collectively, the rich

chapters in this edited volume represent a comprehensive treatment of the existing research on the multimedia experience, with the aim of disseminating the current knowledge base and inspiring future scholarship. The focus on empirical research and the strong psychological framework make this book an exceptional and distinctive contribution to the field. The international collection of contributors represents eight countries and a broad range of disciplines including psychology, musicology, neuroscience, media studies, film, and communications. Each chapter

includes a comprehensive review of the topic and, where appropriate, identifies models that can be empirically tested. Part One presents contrasting theoretical approaches from cognitive psychology, philosophy, semiotics, communication, musicology, and neuroscience. Part Two reviews research on the structural aspects of music and multimedia, while Part Three focuses on research examining the influence of music on perceived meaning in the multimedia experience. Part Four explores empirical findings in a variety of real-world applications of music in

multimedia including entertainment and educational media for children, video and computer games, television and online advertising, and auditory displays of information. Finally, the closing chapter in Part Five identifies emerging themes and points to the value of broadening the scope of research to encompass multisensory, multidisciplinary, and cross-cultural perspectives to advance our understanding of the role of music in multimedia. This is a valuable book for those in the fields of music psychology and musicology, as well as film and media

Born in 1916, Henri Dutilleux is one of France's leading composers, enjoying an international reputation for his beautifully crafted works. This is the first translation into English of a series of interviews between Dutilleux and the French writer and journalist Claude Glayman which took place in 1996. Dutilleux discusses aspects of his life including his early training at the Paris Conservatoire, the German occupation of France and the time that he spent in the United States. The interviews reveal much about
