However, since the World Radiocommunication Conference of 2003 (WRC-03), Morse code has become an optional element in amateur radio practice, and many countries have now removed the compulsory Morse component from their amateur radio licence requirements. Morse is still used outside of the amateur radio world. In aviation, for example, the identification letters of navigation beacons are sent in Morse. Morse can be very useful for emergency communications, as an intelligible message can be ...

A Bencher Morse paddle. UK radio amateurs haven't had to learn Morse code to obtain their licence since July 2003. Until that date the International Telecommunication Union (ITU) required an assessment of Morse code proficiency to be part of the global amateur radio licensing procedure. However, since then Morse code has become an optional element in amateur radio practice, and many countries have now removed the compulsory Morse component from their amateur radio licence requirements.

[Morse code is still worth learning – but why? - Radio ...](#)

Morse code is still used by amateur radio operators. Operators may either key the code manually using a telegraph key and decode by ear, or they may use computers to send and receive the code. Continuous wave (CW) Modulated continuous wave (MCW) is most often used by repeaters for identification.

[List of amateur radio modes - Wikipedia](#)

Amateur radio frequency allocation is done by national telecommunication authorities. Globally, the International Telecommunication Union oversees how much radio spectrum is set aside for amateur radio transmissions. Individual amateur stations are free to use any frequency within authorized frequency ranges; authorized bands may vary by the class of the station license. Radio amateurs use a variety of transmission modes, including Morse code, radioteletype, data, and voice. Specific frequency a

For many of today's hams there was no choice; obtaining a ham license required learning Morse code. Five words a minute was the requirement for the entry level Novice license and also for the renewable, but VHF only, Technician ticket. A General or Advanced class required 13 wpm and it was 20 wpm for an Extra.

[Learning Morse Code - American Radio Relay League](#)

Morse code lies at the very origins of amateur radio. Originally, amateur radio communications occurred exclusively in Morse. After 1920, voice-capable radio transmitters became commonly available, but Morse code has carried on as a popular area of amateur radio. Until 2003 the International Telecommunication Union (ITU) required assessment of Morse code proficiency as part of the global amateur radio licensing procedure.

[International Morse Code - Classic Publishing](#)

Morse code consists of dits and dahs — NOT dots and dashes, the code sounds like “dit-dah” when it's sent, so, Morse operators don't talk about dot and dash, rather, we say “dit” and “dah.” With a straight key, the operator forms the characters by holding the key down for a short time — dit — or a longer time — dah.
