Distance and Blended Learning in Asia is a unique and comprehensive overview of open, distance learning (ODL) and information and communication technology (ICT) in Asian education and training. Broad in coverage, this book critically examines ODL and ICT experiences from Japan to Turkey and from Sri Lanka to Mongolia – drawing conclusions from the successes and failures, and recommending ways in which planning, management and practice may be developed for the world's largest concentration of adult open and distance learners. This pioneering book draws on Asian theory, research and practice to identify the strengths, weaknesses and challenges in all sectors of Asian education and training. It critically and insightfully discusses the ideas, skills and practices that are necessary to advance knowledge in leadership and management, professional development, innovation and quality assurance and research and diffusion. Distance and Blended Learning in Asia provides an insightful, informative and critical review of ODL / ICT developments in schools, open schooling, colleges, universities, workplace training, professional development and non-formal adult and community education. The book is an invaluable reference for ODL / ICT professionals, educators and students anywhere in the world, and is essential reading for all of those involved in ODL / ICT in Asia.

This publication is a collection of 40 oral testimonies about Beyers Naud,, but also about the apartheid era in general and about the role that Christianity played in that period. In addition to an abundance of insights on Beyers Naud, by those who knew him best, it offers perspectives on the movements and entities that Naud, associated himself with; for example, the Christian Institute, the South African Council of Churches and the people involved in both. Stories unfold ? of faith and suffering, as well as betrayal, all against the background of an overtly racist apartheid state and by implication against a capitalist system with class divisions that degraded human beings and denied their human dignity.ÿ

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. This new edition of the bestselling GED practice/review guide is now bigger and better than ever! Covering all four test subject areas—Reasoning Through Language Arts (RLA), Social Studies, Science, and Mathematical Reasoning—McGraw-Hill Preparation for the GED Test gives you intensive review and practice in all subject areas of the exam. Pretests for each test section help you identify strengths and weaknesses before starting your study. Learning objectives are based on the Common Core State Standards, just like the real exam. Full-length practice tests with complete answer explanations are modeled on the actual exam Filled with exercises for reinforcing new skills and quizzes for measuring

progress

Technology can be a powerful tool for transforming learning. It can help affirm and advance relationships between educators and students, reinvent approaches to learning and collaboration, shrink long-standing equity and accessibility gaps, and adapt learning experiences to meet the needs of all learners. *Technology-Supported Teaching and Research Methods for Educators* provides innovative insights into the utilization and maintenance of technology-supported teaching and research methods for educators. The content within this publication represents the work of e-learning, digital technologies, and current issues and trends in the field of teaching and learning in the context of contemporary technologies. It is a vital reference source for school educators, professionals, school administrators, academicians, researchers, and graduate-level students seeking coverage on topics centered on the integration of effective technologies that will support educators and students.

In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. *The Research Anthology on Developing Effective Online Learning Courses* provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

With an innovative integration of visuals, text, and spatial graphics, *Introduction to Contemporary Geography* presents a modular and highly graphical springboard to introductory geography—ideal for contemporary students and learning styles. This innovative new resource partners best-selling human geography author Jim Rubenstein with environmental and physical geographer Bill Renwick, economic/political/cultural geographer Carl Dahlman, and the information architects at Dorling Kindersley (DK). The authors' approachable prose and DK's bold visual style combine to engage students with little to no science background, encouraging them to become scientifically literate and responsible consumers, readers, and voters.

Rethinking Learning for a Digital Age addresses the complex and diverse experiences of learners in a world embedded with digital technologies. The text combines first-hand accounts from learners with extensive research and analysis, including a developmental model for effective e-learning, and a wide range of strategies that digitally-connected learners are using to fit learning into their lives. A companion to *Rethinking Pedagogy for a Digital Age* (2007), this book focuses on how learners' experiences of learning are changing and raises important challenges to the educational status quo. *Rethinking Learning for a Digital Age*: moves beyond stereotypes of the "net generation" to explore the diversity of e-learning experiences today analyses learners' experiences holistically, across the many technologies and learning opportunities they encounter reveals digital-age learners as creative actors and networkers in their own right, who make strategic choices about their use of digital applications and learning approaches. Today's learners are active participants in their learning experiences and are shaping their own educational environments. Professors, learning practitioners, researchers, and policy-makers will find *Rethinking Learning for a Digital Age* invaluable for understanding the learning experience, and shaping their own responses.

As the field of information technology continues to grow and expand, it impacts more and more organizations worldwide. The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications. This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed. This valuable book is a compilation of the latest research in the area of IT utilization and management.
