In the e-world it is the B2B marketplace. And in the B2B marketplace, the hottest thing--and the thing most likely to turn companies a profit--is e-procurement. This book provides the platform for establishing a company's eprocurement strategy and the necessary steps that will follow in implementing that strategy.

The integration of recent technological advances into modern business processes has allowed for greater efficiency and productivity. However, while such improvements are immensely beneficial, the modeling and coordination of these activities offers a unique set of challenges that must be addressed. Automated Enterprise Systems for Maximizing Business Performance is a pivotal reference source for the latest scholarly research on the modeling and application of automated business systems. Featuring extensive coverage on a variety of topics relating to the design, implementation, and current developments of such systems, this book is an essential reference source for information system practitioners, business managers, and advanced-level students seeking the latest research on achievements in this field. This publication features timely, research-based chapters within the context of business systems including, but not limited to, enterprise security, mobile technology, and techniques for the development of system models.

"Jeffrey Pfeffer and Robert Sutton, identify the causes of the knowing-doing gap and explain how to close it."--Jacket.

This volume constitutes the refereed proceedings of the 4th International Workshop on Grid Economics and Business Models held in August 2007. The twelve full papers are organized into topical sections covering grid business modeling, market mechanisms for the grid, and economic grid service provisioning. The proceedings are rounded off by six project reports that give an overview of current and ongoing research in grid economics.

This book addresses groundwater governance, a subject internationally recognized as crucial and topical for enhancing and safeguarding the benefits of groundwater and groundwater-dependent ecosystems to humanity, while ensuring water and food security under global change. The multiple and complex dimensions of groundwater governance are captured in 28 chapters, written by a team of leading experts from different parts of the world and with a variety of relevant professional backgrounds. The book aims to describe the state-of-the-art and latest developments regarding each of the themes addressed, paying attention to the wide variation of conditions observed around the globe. The book consists of four parts. The first part sets the stage by defining groundwater governance, exploring its emergence and evolution, framing it through a socio-ecological lens and describing groundwater policy and planning approaches. The second part discusses selected key aspects of groundwater governance. The third part zooms in on the increasingly important linkages between groundwater and other resources or sectors, and between local groundwater systems and phenomena or actions at the international or even global level. The fourth part, finally, presents a number of interesting case studies that illustrate contemporary practice in groundwater governance. In one volume, this highly accessible text not only familiarizes water professionals, decision-makers and local stakeholders with groundwater governance, but also provides them with ideas and inspiration for improving groundwater governance in their own environment.

This book explores the burgeoning genre of men's lifestyle magazines, their production and consumption, and related constructions of masculinity. Interdisciplinary exploration of the burgeoning genre of men's lifestyle magazines. Addresses key questions about the production and consumption of men's lifestyle magazines, and their contribution to current gender politics. Contributors make use of a range of methodologies, including interviews with magazine editors, focus groups with readers, corpus linguistics and discourse analysis. Draws on scholarship from sociology, media studies, cultural studies and linguistics. Uses new research data, including comparative data from different countries, gay magazines and sporting magazines.
