Just like the N80, the D100 is almost useless with manual focus lenses. You will need an external exposure meter with non-autofocus lenses and have to set the exposures on the camera manually from what you read on your separate meter. If you work under studio lighting and enjoy constant manual focusing than maybe you'll be OK with manual lenses.

A superb hand-on manual containing a wealth of underwater tips, hints and advice - all beautifully illustrated with brand new, full colour images. Martin Edge, a leading authority on underwater photography, will help you capture stunning effects using his popular 'think and consider' system - offering a heightened awareness and understanding of the subject matter, lighting and environment to take the perfect picture. Practical examples take you step-by-step through the basic techniques from photographing shipwrecks, divers, marine life and abstract images to taking photographs at night and 'dual lighting'. In 1999 the late Jim Church, guru of underwater photography, said: 'As a member of the new generation of underwater photography writers, [Martin has] set a standard that will only be surpassed when [he writes] a third edition.' Here it is, we hope you enjoy it.
