Damage damage and possible de wirement incidents.

Monitoring System

~~Unattended Pantograph Monitoring Systems~~

The Pantograph Condition Monitoring System (PCMS) is installed above the railway to automatically scan the condition of pantographs as they pass underneath. The

Online Library

Pantograph

Damage occurs without any contact between the system and the rollingstock itself: as the vehicle passes through the scan location, the system assesses wear on the pantograph head, and scans for any chips or damaged areas.
