BSPB Plant Breeding Matters. Information from the British Society of Plant Breeders Spring 201 6. Plant Breeding Matters. Commissioned by the European Technology Platform Plants for the Future (Plant ETP), the report by economic consultants Hffa Research GmbH, entitled ' The economic, social and environmental value of plant breeding in the European Union ' uses the latest data modelling and calculation techniques to quantify the contribution of EU plant breeding INCOMacross a range of ...

BSPB Plant Breeding Matters

BSPB Plant Breeding Matters. Information from the British Society of Plant Breeders Autumn 201 5. Plant Breeding Matters. Tom Heap opened by highlighting the enormous contribution plant breeders have made in advancing crop productivity over the past 50 years, but he suggested that the success of agri- science innovation since the Green Revolution also meant that people had begun to take the contribution of scientific progress in agriculture and food production for granted.

BSPB Plant Breeding Matters—Combining Excellence

BSPB represents plant breeders and breeders ' agents, breeding and marketing varieties of all the major arable, fodder and vegetable crops and amenity grass in the UK. Our members range from large multinational companies to independent SMEs and public sector research organisations and together comprise virtually 100% of public and private sector crop plant breeding activity in the UK.

Members—BSPB

Plant breeding (crossing, selecting and conducting trials) typically takes a decade or more. The purpose of Turfgrass Seed is to report comprehensive results of available varieties in trials designed to test suitability for: Use in winter sports pitches, such as football and rugby fields, and municipal recreation areas (Sports Uses Trials)

BSPB Turfgrass Seed booklet

To fund this investment breeders are awarded a form of intellectual property, known as Plant Variety Rights, on each new variety. Licensing the use of this intellectual property allows royalties to be collected when a protected variety is produced and sold as certified seed, or when it is used as farm-saved seed. BSPB acts on its members ' behalf to license and collect royalties on the production and sale of certified seed of protected varieties of cereals, pulses, potatoes and grasses in ...

Royalty collection—BSPB

Plant breeding is the business and science of crop improvement. It is an innovation–based sector, focused on developing plants better adapted to human needs. The demand for new varieties of agricultural and horticultural crops, adapted to our unique growing conditions, is never ending, driven by the challenges of new pest and disease pressures, weather patterns and changing market requirements.

Plant Breeding Matters

Plant breeding provides the essential platform for competitive and sustainable UK agriculture, delivering major advances in the yield, quality and performance of our key arable crops.

Fair Play

The British Society of Plant Breeders (BSPB) has appointed Samantha Brooke as its new chief executive effective from July 1st. She succeeds Dr Penny Maplestone, who left the BSPB after 22 years – the last 16 as chief executive – last month to set up her own garden design and maintenance business. Ms Brooke has over 17 years commercial experience in the UK and European plant breeding and seed supply sectors.

Sam Brooke to lead the BSPB—AgriTrade News

Modern plant breeding is an increasingly sophisticated, high-investment business. The majority of commercial plant breeding takes place within the private sector. Plant breeding work is also carried out in a limited number of research institutes. Plant breeders are employed in a range of areas including:

Plant breeder/geneticist job profile | Prospects.ac.uk

Plant Breeding Matters Speaking at BSPB ' s Annual Dinner in London earlier this year, Lord de Mauley said: " I am very pleased to endorse the PVR campaign in highlighting the contribution of plant breeding as the starting point in the UK ' s £90 billion food supply chain.

BSPB Plant Breeding Matters

Plant breeding vital for sustainable agriculture – ADAS study By delivering improvements in crop yields, resource use efficiency and reduced environmental impact, plant breeding has been a major contributor to meeting the goals of sustainability in agriculture, according to the interim findings of an independent review by ADAS.

BSPB Plant Breeding Matters

The BSPB Amenity Committee BSPB is the trade association, based at Ely in Cambridgeshire, which represents the interests of companies with plant breeding and seeds supply businesses in the UK. Companies can participate as Full Members or Associates and the Society caters for businesses with large or small turnovers.

The buyers guide to quality amenity—Plant Breeding

Sustainable intensification in agriculture is not an aspiration, it is an imperative, and the plant breeding industry is uniquely placed to deliver the genetic innovation required to meet the combined global challenges of food security, climate change and environmental protection.

Plan-B reeding Ma-e

The British Society of Plant Breeders (BSPB) said the EU survey showed a 'strong interest' in using new tools to enhance the speed and accuracy of crop breeding programmes.

EU is stifling gene editing tools, plant breeding firms ...

FAIR PLAY is a joint initiative between the British Society of Plant Breeders (BSPB) and the major UK farming unions (NFU, NFU Scotland, Ulster Farmers Union). All four organisations support the campaign ' s objective to safeguard investment in plant breeding by optimising the collection of FSS payments from individual farmers.

Support—Fair Play

Plant breeding is the business, science and art of plant improvement. It enhances the performance and quality of plants in a sustainable manner meeting consumers ' changing demands, preferences and tastes.
