<p>This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions including those relating to transportation and transshipment, assignment, and Game Theory&amp;illustrated with screen-shots of a computer with a TORA package. Readers whether students, business executives, managers, researchers and academicians will find that the insights and knowledge obtained from the book will stand them in good stead in both academic as well as occupational pursuits.</p>
<p>Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it affects decision-making, is very important for a manager. And very often, students find Accounting as one of the ' tough ' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting – Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements, trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial competence and decision-making skills. KEY FEATURES Emphasises the various accounting and decision-making techniques. Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.</p>
<p>This text is designed to provide an understanding of quantitative techniques, this manual is suitable for students on IComA, ACCA, CIMA, CIPFA, ICMA, IDPM, BA Business Studies and BTEC higher level courses. It contains self-review questions and longer examination answers. A lecturers' support pack is included.</p>
<p>The growth in mergers and acquisitions (M&amp;A) activity around the world masks a high rate of failure. M&amp;A can provide companies with many benefits, but in the optimism and excitement of the deal many of the challenges are often overlooked. This comprehensive collection, bringing together an international team of contributors, moves beyond the theory to focus on the practical elements of mergers and acquisitions. This hands-on, step-by-step volume provides strategies, frameworks, guidelines, and ample examples for managing and optimizing M&amp;A performance, including: ways to analyze different types of synergy; understanding and analyzing cultural difference along corporate and national cultural dimensions, using measurement tools; using negotiation, due diligence, and planning to analyze the above factors; making use of this data during negotiation, screening, planning, agreement, and when deciding on post-merger integration approaches. Students, researchers, and managers will find this text a vital resource when it comes to understanding this key facet of the international business world.</p>
<p>This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.</p>

<p>This immensely dependable mentoring book is specially published for the aspirants of 'MBA Entrance Examination' organised by the Jamia Millia Islamia University (JMI). Based on the Latest Pattern of the exam, the book also comprises a Solved Model Paper for aspirants to make them familiar with the type of questions asked, and their answers. The book is highly recommended for the aspirants to Sharpen their Problem Solving Skills with intensive practice of numerous important questions provided in the book, and prepare them to face the exam with Confidence, Successfully. The book contains ample amount of Study and Practice Material comprising numerous Solved MCQs on all the relevant Subjects &amp; Topics. Most of the practice questions incorporated in the book have been modelled on questions of various previous exam papers and solved by the respective subject-experts. Detailed explanatory answers have also been provided for selected questions for Better Understanding of readers in a Reader-friendly manner. In short, you can bank upon this book for study, practice and during the precious moments before the exam. While the well-prepared study and practice material of this book is designed for you to Master your Success, your own intelligence and practice with this will definitely Ensure you Success in your Endeavour and help secure a seat in the prestigious course paving the way for a Bright Career.</p>
<p>Quantitative Techniques: Theory and Problems adopts a fresh and novel approach to the study of quantitative techniques, and provides a comprehensive coverage of the subject. Essentially designed for extensive practice and self-study, this book will serve as a tutor at home. Chapters contain theory in brief, numerous solved examples and exercises with exhibits and tables.</p>
