From Embryonic Breathing, the Qi can be built up and stored at the Lower Dan Tian to an abundant level. This is the crucial key to Muscle/Tendon Changing and Marrow/Brain Washing (Iron Shirt) Qigong practice. To reach the goal of Muscle/Tendon Changing, you must learn Small Circulation meditation. The purpose of the Small Circulation is for the mind to lead the Qi to circulate smoothly and abundantly in the two major Qi vessels: Conception and Governing Vessels.

~~Embryonic Breathing | YMAA~~

The concept of Embryonic Breathing (Tai Xi or T'ai Hsi) is probably well-known to most practitioners of QiGong or Daoism, yet the technique is widely misunderstood and mistaken for many things related or even unrelated. This three-part article is meant to clear up some of the confusion through dispelling myths, and introducing solid, down-to-earth explanations and techniques to follow, in order to understand the true meaning of breath.

~~Understanding Embryonic Breathing, Part 1: Abdominal ...~~

Embryonic Breathing has always been a huge subject in Qigong practice. This is because it is the breathing method that allows you to store the Qi in the Real Lower Dan Tian (Zhen Xia Dan Tian, 下丹田) In other words, through Embryonic Breathing, you are able to charge your bio-battery to a high level.

~~Reverse Abdominal Breathing - Embryonic Breathing~~

Best way to practice Embryonic breathing is in a sitting meditation. After you have gone through many months of practicing and prior steps in breathing, now it's time to focus on both Dantians. You will connect both Dantians by including the central line of Chong Mai extraordinary meridian which will serve as a bridge and a channel for the energy stream.
