Action research refers to a wide variety of evaluative, investigative, and analytical research methods designed to diagnose problems or weaknesses—whether organizational, academic, or instructional—and help educators develop practical solutions to address them quickly and efficiently. Action research may also be applied to programs or educational techniques that are not necessarily experiencing any problems, but that educators simply want to learn more about and improve.

Action Research □ Qualitative Methods

Qualitative Research in Action is an introduction to qualitative research methods for undergraduate students who do not have experience with doing qualitative research. The book provides both a discussion of the theoretical underpinnings of qualitative research and practical advice to help students apply the methods described.

Qualitative Research in Action: A Canadian Primer (Themes ...

Revised on July 30, 2020. Qualitative research involves collecting and analyzing non-numerical data (e.g., text, video, or audio) to understand concepts, opinions, or experiences. It can be used to gather in-depth insights into a problem or generate new ideas for research. Qualitative research is the opposite of quantitative research, which involves collecting and analyzing numerical data for statistical analysis.

the research problem. This is your working theory of the phenomena under investigation.

## Sample of the Qualitative Research Paper

Action research is a philosophy and methodology of research generally applied in the social sciences. It seeks transformative change through the simultaneous process of taking action and doing research, which are linked together by critical reflection. Kurt Lewin, then a professor at MIT, first coined the term "action research" in 1944. In his 1946 paper "Action Research and Minority Problems" he described action research as "a comparative research on the conditions and effects of various forms
