Presents a guide to writing a research paper, covering such topics as finding sources, taking research notes, creating an outline, writing the first draft, and completing the final version.

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, College Essay Essentials is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

First-Generation College Student Research Studies offers uniquely designed chapters that are drawn from both quantitative and qualitative theoretical frameworks found in higher education. This edited volume is a must-read that contributes greatly to the research literature surrounding this student population.

This volume is a guide to using the library for the purpose of conducting research, using both traditional and online resources. Students will learn to select a topic, effectively find and evaluate the best information in both print and electronic formats, and produce accurate and complete citations based on current versions of important styles guides and web resources. Each chapter includes exercises that reinforce the instruction and guidance.

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

Public Health Law Research: Theory and Methodsdefinitively explores the mechanisms, theories and models centralto public health law research - a growing field dedicated to measuring and studying law as a central means for advancing publichealth. Editors Alexander C. Wagenaar and Scott Burris outlineintegrated theory drawn from numerous disciplines in the social andbehavioral sciences; specific mechanisms of legal effect andguidelines for collecting and coding empirical datasets ofstatutory and case law; optimal research designs for randomizedtrials and natural experiments for public health law evaluation;and methods for qualitative and cost-benefit studies of law.. Theyalso discuss the challenge of effectively translating the results of scientific evaluations into public health laws and highlight theimpact of this growing field. "How exactly the law can best be used as a tool forprotecting and enhancing the public's health has long been the subject of solely opinion and anecdote. Enter PublicHealth Law Research, a discipline designed to bring the brightlight of science to the relationships between law and health. This book is a giant step forward in illuminating thatsubject." -- Stephen Teret, JD, MPH, Professor, Director, Center for Law and the Public's Health, Johns Hopkins BloombergSchool of Public Health "Wagenaar and Burris bring a dose of much needed rigor tothe empirical study of which public health law interventions reallymatter, and which don't." -- Bernard S. Black, JD,Chabreja Professor, Northwestern University Law School and KelloggSchool of Management Companion Web site: www.josseybass.com/go/wagenaar

"Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last--and none too soon--is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With Grading for Equity, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, Grading for Equity provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a "fixed mindset" about students' academic potential--practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a "true north" orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, "Grading practices are a mirror not just for students, but for us as their teachers." Each one of us should start by asking, "What do my grading practices say about who I am and what I believe?" Then, let's make the choice to do things differently . . . with Grading for Equity as a dog-eared reference.
