~~Rosenzweig Picture Frustration Test Administration Manual~~
Building on these two facts, S. Rosenzweig (1947—49) has constructed a test which presents the subject with frustrating situations on the theory that the way they are handled will be a significant index of emotional adjustment.The test consists of a series of cartoon situations which depict frustrating circumstances experienced in everyday life. In one of these cartoons, a car splashes a pedestrian and the driver says, "I am very sorry we splashed you.

~~Rosenzweig picture-frustration test - LC Linked Data ...~~
Rosenzweig's study of aggression led to the development of the Rosenzweig Picture-Frustration Study, a test of latent hostility. The Rosenzweig Picture Frustration Study is usually considered a semi-projective technique and involves an examinee responding verbally to a semi-ambiguous picture scenario. Each of the three forms (child, adolescent, and adult) consists of 24 comic strip pictures that portray a situation that might induce frustration.

~~Saul Rosenzweig - Wikipedia~~
method of administration □ test administration involves the administrator requesting children to complete three individual drawings on separate pieces of paper. □ children are asked to draw a man, a woman, and themselves. □ no further instructions are given and the child is free to make the drawing in whichever way he/she would like.

~~NEUROPSYCHOLOGICAL TESTS PART - 2 - SlideShare~~
Rosenzweig Picture Frustration Test, PFT. This is a semi-structured projective test to assess tolerance or intolerance to a frustrating situation (59). It consists of 24 vignettes where pairs of characters are interacting. The subject assumes the role of one of the characters and provides his or her expected behavior in that situation.

Adapting Educational and Psychological Tests for Cross-Cultural Assessment critically examines and advances new methods and practices for adapting tests for cross-cultural assessment and research. The International Test Commission (ITC) guidelines for test adaptation and conceptual and methodological issues in test adaptation are described in detail, and questions of ethics and concern for validity of test scores in cross-cultural contexts are carefully examined. Advances in test translation and adaptation methodology, including statistical identification of flawed test items, establishing equivalence of different language versions of a test, and methodologies for comparing tests in multiple languages, are reviewed and evaluated. The book also focuses on adapting ability, achievement, and personality tests for cross-cultural assessment in educational, industrial, and clinical settings. This book furthers the ITC's mission of stimulating research on timely topics associated with assessment. It provides an excellent resource for courses in psychometric methods, test construction, and educational and/or psychological assessment, testing, and measurement. Written by internationally known scholars in psychometric methods and cross-cultural psychology, the collection of chapters should also provide essential information for educators and psychologists involved in cross-cultural assessment, as well as students aspiring to such careers.
