**Dream of smart cities has to start from smart towns and ...**

Rural areas face a real and complex challenge, which needs to be tackled by a smart approach. The 'smart cities' concept has already borne fruit throughout Europe. It is a logical consequence for us to now develop a 'smart village' to add to what is already working in cities.

**EU should extend 'smart cities' to 'smart villages'**

Initially, the concept of Smart Cities (urban settlement) originated from the Internet of Things (IoT) technology, however, the use of IoT technology can be extended to the concept of Smart Villages (rural settlement) as well, improving the life of the villagers, and the communities as a whole. Yet, the rural settlements have slightly different requirements than the urban like settlements.

Why concentrate on villages? Almost 70% of the Indian population lives in villages. In recent times, more cases of farmers' suicides due to crop failure have been reported. Even after 70 years of independence, we lack a 'support and guidance system'; nor do we have professional counselling for farmers. Many of them have no ... **Lessons from Smart Cities - for Smart Villages**

Smart Villages is a new concept that can be instrumental for the development of rural areas. EU rural areas are places of great assets and they can become even more attractive if we enable local actors to unlock their potential. Fostering urban-rural linkages and creating synergies can help Europe to achieve more cohesive and balanced development. Participants will be able to take part in interactive thematic discussions with practical examples on how to pursue the transition to smart ...
