There are few people alive who are so cruel, so heartless and so undeniably evil that they will kill again and again. Yet at any one time, there are between 25 and 50 active serial killers in the USA, and their chilling crimes have fascinated us since the days of Jack the Ripper. Here you will discover how these heartless killers committed their gruesome deeds, what motivated them to kill and how, eventually, they were caught. This collection features more than 50 compelling stories, including: * Ed Kemper, who dismembered the bodies of his victims once he had finished with them; * Ted Bundy, who abducted, raped and brutally killed more than 30 women; * Charles Manson, who led a cult of mayhem and murder; * Jeffrey Dahmer, who stored a human head in his freezer; * Randy Kraft, who was pulled over for drunk driving with a body in the trunk of his car; * Alexander Pichushkin, who aimed to kill a person for every square on the chessboard.

'I wrapped duct tape around her mouth and her nose and watched her suffocate to death . . . then I went back to work' - former Colonel David Russell Williams of the Royal Canadian Air Force, 2010 Sunday Times-bestselling author Christopher Berry-Dee is back with a companion volume that delves even deeper into the savage world of psychopaths and their hideous crimes. This time, however, he combines sections on killers whom he has known, interviewed or corresponded with, with studies of psychopathic serial killers from the past, including Peter Kürten, the 'Düsseldorf Monster', John Christie, responsible for the killings at 10 Rillington Place; and Neville Heath, a ladykiller in every sense of the word. The result is a chilling narrative that sets the forensic examination of killers and their crimes within the context of murder in the twentieth and twenty-first centuries, an examination of the evil mind set against the insoluble problem of identifying psychopaths who kill. This is not a book for the squeamish, but it is undeniably fascinating in its portrayal of just what one human being will do to others - while all too often moving among us unnoticed and unhindered. If their crimes seem as incomprehensible as they are horrific, it is undeniably true that the

world's most savage killers may be much closer than we think . . .

A collection of true accounts of some of history's most brutal murders is complemented by testimony by the killers themselves, in a sobering volume that features crimes committed by such figures as John Wayne Gacy, the Hillside Strangles, and the Genessee River Killer. Original.

Having delved into the heads of many of the world's most notorious murderers and published his gripping findings in the bestselling *Talking with Serial Killers*, for his latest book, renowned crime expert Christopher Berry-Dee has gained the trust of more monsters across the world and entered their prison lairs to discuss in detail their horrific crimes. Looking at the unique reality of their criminal lives and documenting the extent of their brutishness and cruelty, this book delves deep into the dysfunctional minds of a dozen social outcasts. Christopher Berry-Dee has also spent hundreds of hours corresponding with those incarcerated for the rest of their days and those on death row awaiting execution. Every sentence, paragraph and page of their writing provides clues to the reasons behind their homicidal behaviour -- making this book a must-read for aficionados of the genre and anyone fascinated by the extremes of the human condition. As you too come face-to-face with the most evil people in the world, their crimes will undoubtedly sicken and terrify; their words, however, will fascinate as you are drawn in to a world of hate, corruption, obsession, lust, power, terror and ultimately, death. Beyond the headlines, once the courtroom drama has subsided and the prison gates locked behind them for good, *Dead Men Talking* allows you to get up close and personal with torturers, psychopaths and mass murders, to read the stories that are rarely heard and get the last word from some of the world's worst criminals.

"Part true crime, part neuroscience and a page-turner from start to finish," this is a look at the biology behind violent psychopathic behavior (Kirkus Reviews). How many times have you seen a murder on the news or on a TV show like *CSI: Crime Scene Investigation*, and said to yourself, "How could someone do something like that?" Today, neuroscientists are imaging, mapping, testing and dissecting the source of the worst behavior imaginable in the brains of the people who lack a conscience: psychopaths. Neuroscientist Dean Haycock examines the behavior of real life psychopaths and discusses how their actions can be explained in scientific terms, from research that literally looks inside their brains to understanding how psychopaths, without empathy but very goal-oriented, think and act the way they do. Some don't commit crimes at all, but rather make use of their skills in the boardroom. But what does this mean for lawyers, judges, psychiatrists, victims, and readers—for anyone who has ever wondered how some people can be so bad. Could your nine-year-old be a psychopath? What about your co-worker? The ability to recognize psychopaths using the scientific method has vast implications for society, and yet is still loaded with consequences.

Christopher Berry-Dee is the man who talks to serial killers. He has penetrated their minds and gained their trust to produce one stomach-churningly compulsive selection of tales already, and his unique collection of audiotape and videotape interviews has been collated into another disturbing book. Not only does he describe the circumstances of his meeting with some of the world's most evil men, he also reproduces, verbatim, their very words as they describe their crimes. This book is a fascinating glimpse into the world's worst of the worst and will be required reading for anyone interested in the inner workings of the sickest minds, as well as for fans of Berry-Dee's work.
