Towards Monetary And Financial Integration In East Asia

Most economists would argue that monetary integration leads to financial integration; in other words, when a set of countries has a common currency, as in the European Monetary Union (EMU), for example, those countries also would tend to have more extensive international financial activity. Two main reasons are generally cited.

Monetary and Financial Integration: Evidence from the EMU

The assessment also indicates that despite some financial developments, African financial market activities remain shallow, with capital markets characterized by low capitalization and liquidity. The report also provides policymakers with recommendations on how to deepen
