In August, we reported on AT&T's renewed interest in selling DirecTV in an effort to offload debt. The company had reportedly already been actively discussing a sale with Private equity investors at that time. Now, sources have provided additional information, saying that the deal would include a "significant minority stake" in DirecTV, AT&T Now, and [...]

Your days of feeling enslaved, discouraged, and overwhelmed by your financial problems are over! From struggling financially all the way up to building a successful worldwide ministry and enjoying financial freedom, author Gary Keesee shares his journey and his proven successful principles so you can control your finances. You will learn the spiritual laws of God's Kingdom and exactly how to apply each principle discussed. Also clearly and expertly explained is how to: Find lost money. Put a plan in place to be out of debt in less than 7 years (including your mortgage!). Save in every area of life. See that the financial laws of the Kingdom can intersect with the natural realm to bring you freedom from worry and fear. From pitfalls to avoid to proactive steps to take, the path to financial freedom is clearly illuminated. Fixing the Money Thing is not a book of boring numbers and budgets—it is an inspirational book that will change your life in many positive and lucrative ways.

New communication technologies are being introduced at an astonishing rate. Making sense of these technologies is increasingly difficult. Communication Technology Update is the single best source for the latest developments, trends, and issues in

Bookmark File PDF Tv Guide Network Directv

communication technology. Now in its ninth edition, Communication Technology Update has become an indispensable information resource for business, government, and academia. As always, every chapter has been completely rewritten to reflect the latest developments and market statistics, and now covers mobile computing, digital photography, personal computers, digital television, and electronic games, in addition to the two dozen technologies explored in the previous edition. The book's companion website (www.tfi.com/ctu) offers updated information submitted by chapter authors and offers links to other Internet resources. *Valuable reference for communications/broadcast professionals and students *Single source for the latest developments, trends, and issues in communication technology *New data on teleconferencing, digital TV, and computer games

Corporations and Cultural Industries: Time Warner, Bertelsmann, and News Corporation, by Scott Warren Fitzgerald, fills an important neglected area in communication and media studies through its sustained, theoretically-grounded, and empirically rich analysis of three of the most important global media conglomerates of our time: Time Warner, Bertelsmann, and News Corp. The book examines how financialization processes re-gear the internal operations of media corporations in a manner that pits one sector

against another.

Competitive Strategy for Media Firms introduces the concepts and analytical frameworks of strategic and brand management, and illustrates how they can be adapted according to the characteristics of distinct media products. Working from the premise that all media firms must strategize in response to the continuing evolution of new media, author Sylvia M. Chan-Olmsted offers applications of common business approaches to the products and components of the electronic media industry, and provides empirical examinations of broadcast, multichannel media, enhanced television, broadband communications, and global media conglomerate markets. This insightful and timely volume provides a thorough review of current concepts and industry practices, and serves as an essential primer for the application of business models in media contexts. As a realistic and integrated approach to media industry studies, this volume has much to offer researchers, scholars, and graduate students in media economics and management, and will be an important reference for industry practitioners.

The horse racing industry has been a pioneer in interactive media, information networks, and their deployment. The race track and the off-track betting parlor offer interactive media environments that reconfigure the relationships among private and public space and presence and copresence. In this book, Holly Kruse explores how horse racing has used media over the last several decades, arguing that examining the history and context of horse racing and gambling gives us a clearer understanding of the development of data networks, media complexes, public entertainment, and media publics. Kruse describes an enormous industry that depends on global information and communication flows made possible by a network linking racetracks, homes, off-track betting, farms, and auction sites. Racetrack architecture now allows for the presence of screens, most showing races from other locations. Online betting sites enable bettors to wager from home. Off-track betting facilities collect wagers on races from all over the country. Odds are set interactively through the pari-mutuel market system. Kruse considers the uses of public space, and its redefinition by public screens; the effect of interactive media on the racing industry, including networked, in-home betting; the "technopanic" over online poker and the popularity of in-
