The FANUC CNC Power Motion i-A is the ideal high response CNC for efficient high performance motion control and a wide range of industrial machining applications. With capabilities including multi-axis and multi-path functionality for position, speed and torque control, it makes the ideal solution for press machines, loaders, stamping machines, wire saw, winding and filling machines to name but a few.

~~Control and drive systems~~—FANUC FANUC ROBOGUIDE is a robot simulator that simulates both the robot's motion and application commands, significantly reducing the time it takes to create new motion setups. To ensure minimal impact on production, cells can be designed, tested and modified entirely offline.
