At the French Culinary Institute, Lauren Shockey learned to salt food properly, cook fearlessly over high heat, and knock back beers like a pro. But she also discovered that her real culinary education wouldn't begin until she actually worked in a restaurant. After a somewhat disappointing apprenticeship in the French provinces, Shockey hatched a plan for her dream year: to apprentice in four high-end restaurants

around the world. She started in her hometown of New York City under the famed chef Wylie Dufresne at the molecular gastronomy hotspot wd-50, then traveled to Vietnam, Israel, and back to France. From the ribald kitchen humor to fiery-tempered workers to tasks ranging from the mundane (mincing cases of shallots) to the extraordinary (cooking seafood on the line), Shockey shows us what really happens behind the scenes in haute cuisine, and includes original recipes integrating the techniques and flavors she learned along the way. With the dramatic backdrop of restaurant life, readers will be delighted by the

## Context

The present work is the fourth volume of the twenty projected volumes of our "Seminars of Jacques Derrida Series" edited by Geoffrey Bennington and Peggy Kamuf. The work derives from an early phase of Derrida's teaching at the Ecole Normale Supérieure at Ulm from 1964-5. In this course Derrida presents an almost surgically precise reading of Heidegger's "Being and Time" based on the original German text most of which had not yet been translated into French. The course thus marks the very beginning of the study of

Heidegger s work in French higher education. It also heralds the analyses of Heidegger s work that Derrida would go on to propose, not only in the years immediately following, but also others that come much later. He frequently returned in subsequent published works to one particular paragraph of *Sein und Zeit*, ( 72 on thrownness ), so central to this 1964-5 course, and to another sustained exchange with Heidegger, whose central theme of inauthenticity is clearly broached here. One can also observe here how Derrida s thinking is settling into place and is elaborating its major operative concepts:

writing, text, and graft. On the other hand, the very term deconstruction, explicitly proposed as a translation of "Destruktion," is several times put aside here in favor of other translations such as sollicitation and shaking up, which will, with a few exceptions, not be retained in Derrida's thinking. It is only much later that Derrida will lay claim to the word deconstruction and develop it in numerous ways. The work is thus essential for scholars of Heidegger, French philosophy, and Derrida himself."

wishfully harboured by so many, the opening years of the twenty-first century have seen the morality of war remain urgently central to political argument around the world. The just war tradition has provided one of the most beguiling frameworks for the question of when it is right to go to war, and how war ought to be conducted. However, criticisms of it are as old as the tradition itself and many now claim that the nature of contemporary warfare has made it truly redundant. This book addresses the criticisms and explores new angles to just war thinking, analysing its practical adequacy in the face

of modern-day realities. It is written with the aim of stimulating debate, recasting or revivifying critical reservations, but also powerfully demonstrating how just war theory cannot be ignored if we take seriously the moral questions warfare forces upon us. Key Features\* Focuses on individual elements of Just War Theory to clarify specific claims and explore very particular issues\* Uses a clear, analytical writing style to ensure clarity for the reader\* Raises new questions not addressed in other Just War literature\* Focuses on contemporary moral applications of Just War theory\* Shows how Just War theory
