Slavery in the Ottoman Empire was a legal and significant part of the Ottoman Empire's economy and traditional society. The main sources of slaves were wars and politically organized enslavement expeditions in North and East Africa, Eastern Europe, the Balkans, and the Caucasus. It has been reported that the selling price of slaves decreased after large military operations.

". . . a much-needed volume on a neglected topic that is of great interest to scholars of women, slavery, and African American history." —Drew Faust Gender was a decisive force in shaping slave society. Slave men's experiences differed from those of slave women, who were exploited both in reproductive as well as productive capacities. The women did not figure prominently in revolts, because they engaged in less confrontational resistance, emphasizing creative struggle to survive dehumanization and abuse. The contributors are Hilary Beckles, Barbara Bush, Cheryl Ann Cody, David Barry Gaspar, David P. Geggus, Virginia Meacham Gould, Mary Karasch, Wilma King, Bernard Moitt, Celia E. Naylor-Ojurongbe, Robert A. Olwell, Claire Robertson, Robert W. Slenes, Susan M. Socolow, Richard H. Steckel, and Brenda E. Stevenson.

This book provides critical perspectives on the multiple forms of 'mothering' that took place in Atlantic slave societies. Facing repeated child death, mothering was a site of trauma and grief for many, even as slaveholders romanticized enslaved women's work in caring for slaveholders' children. Examining a wide range of societies including medieval Spain, Brazil, and New England, and including the work of historians based in Brazil, Cuba, the United States, and Britain, this collection breaks new ground in demonstrating the importance of mothering for the perpetuation of slavery, and the complexity of the experience of motherhood in such circumstances. This pathbreaking collection, on all aspects of the experience, politics, and representations of motherhood under Atlantic slavery, analyses societies across the Atlantic world, and will be of interest to those studying the history of slavery as well as those studying mothering throughout history. This book comprises two special issues, originally published in *Slavery & Abolition* and *Women's History Review*.

The 250th anniversary of the founding of Rutgers University is a perfect moment for the Rutgers community to reconcile its past, and acknowledge its role in the enslavement and debasement of African Americans and the disfranchisement and elimination of Native American people and culture. *Scarlet and Black* documents the history of Rutgers's connection to slavery, which was neither casual nor accidental—nor unusual. Like most early American colleges, Rutgers depended on

slaves to build its campuses and serve its students and faculty; it depended on the sale of black people to fund its very existence. Men like John Henry Livingston, (Rutgers president from 1810 – 1824), the Reverend Philip Milledoler, (president of Rutgers from 1824 – 1840), Henry Rutgers, (trustee after whom the college is named), and Theodore Frelinghuysen, (Rutgers ' s seventh president), were among the most ardent anti-abolitionists in the mid-Atlantic. Scarlet and black are the colors Rutgers University uses to represent itself to the nation and world. They are the colors the athletes compete in, the graduates and administrators wear on celebratory occasions, and the colors that distinguish Rutgers from every other university in the United States. This book, however, uses these colors to signify something else: the blood that was spilled on the banks of the Raritan River by those dispossessed of their land and the bodies that labored unpaid and in bondage so that Rutgers could be built and sustained. The contributors to this volume offer this history as a usable one—not to tear down or weaken this very renowned, robust, and growing institution—but to strengthen it and help direct its course for the future. It is often thought that slaveholders only began to show an interest in female slaves' reproductive health after the British government banned the importation of Africans into its West Indian colonies in 1807. However, as Sasha Turner shows in this illuminating study, for almost thirty years before the slave trade ended, Jamaican slaveholders and doctors adjusted slave women's labor, discipline, and health care to increase birth rates and ensure that infants lived to become adult workers. Although slaves' interests in healthy pregnancies and babies aligned with those of their masters, enslaved mothers, healers, family, and community members distrusted their owners' medicine and benevolence. Turner contends that the social bonds and cultural practices created around reproductive health care and childbirth challenged the economic purposes slaveholders gave to birthing and raising children. Through powerful stories that place the reader on the ground in plantation-era Jamaica, *Contested Bodies* reveals enslaved women's contrasting ideas about maternity and raising children, which put them at odds not only with their owners but sometimes with abolitionists and enslaved men. Turner argues that, as the source of new labor, these women created rituals, customs, and relationships around pregnancy, childbirth, and childrearing that enabled them at times to dictate the nature and pace of their work as well as their value. Drawing on a wide range of sources—including plantation records, abolitionist treatises, legislative documents, slave narratives, runaway advertisements, proslavery literature, and planter correspondence—*Contested Bodies* yields a fresh account of how the end of the slave trade changed the bodily experiences of those still enslaved in Jamaica.
